16. The Commander-in-Chief strongly protests against the statement in Paragraph (11) that he objects to the Military Supply Member "criticising" the opinions recorded by himself on military questions.

17. I have now referred to the whole of the charge of serious misrepresentation which the Commander-in-Chief has directed against the Summary of his proposals telegraphed by me to the Secretary of State, and I have substantiated every paragraph of that Summary.

18. It only remains for me to add that the detailed argument in which I have now been compelled to indulge appears to me to have conclusively established the truth of the conclusions which in the same telegram to the Secretary of State I deduced from the facts.

PARTITION AND THE HIGH COURT.

The Acting Secretary, Bengal Chamber of Commerce, has addressed the following letter to the Secretary of the Government of India, Home Department, on the above subject:—

2. The Committee observe with a certain measure of satisfaction that it is the intention of the Government of India, as at present constituted, to leave the jurisdiction of the Court undisturbed. But it is also clear to them that Government see a difficulty in binding themselves, much less their successors, to an assurance that the jurisdiction may not be curtailed or modified in the distant or even the immediate future, under the altered circumstances which the partition will entail.

3. The Committee, therefore, feel it to be essential that the public should be reassured upon this point; and they venture respectfully to urge that Government should endeavour to specify the means and methods by which at least satisfactory assurances may be given. It is becoming more and more necessary, by reason of the growing fears on the subject, that these assurances should be of such a nature as to go beyond an expression of the intentions of Government; they should be so devised as to constitute an effective safeguard against the contingency which is so much apprehended.

(b) That, if so recommended by the High Court, the needs of the new province should be met by a suitable modification of the English circuit system, whereby the Calcutta Court would depute its judges to visit periodically the capital and other populous centres of Eastern Bengal and Assam.

And (b) that, if the jurisdiction of the High Court should ever hereafter be altered, as regards the new province, it should not be displaced by a Chief Justice and a High Court, possessing similar powers, similar to the High Court of the new province.

4. The Committee would most earnestly recommend that assurances to the foregoing effect should be included in, and should form an integral part of, the scheme for the creation of the new province. They have already alluded to the grave apprehensions which are felt by the public as regards the future of the High Court in relation to the partition scheme. These apprehensions are so generally and so strongly held, that public bodies and individuals who, like the Chamber, do not object to the partition on other grounds, are disposed to withhold their support—if they do not even enter into active opposition—unless it can be made as clear as is practicable that the status, jurisdiction and functions of the High Court will not be prejudicially affected. It is for this reason, and with the object of allaying public agitation, that the Committee have taken the liberty of making the recommendations detailed in the preceding paragraphs. They still adhere to the position defined in their letter of 19th March 1904, namely, that they do not take exception to the partition, provided the position of the High Court is properly and effectively safeguarded.
