FOREWORD

Universal access to information and knowledge lies UNESCO's overall mandate to promote the free flow of information by word and by image and thus to place information and knowledge at the doorsteps of communities. UNESCO strives to forge an enabling environment to facilitate and open up avenues for universal access to information and knowledge.

Open Access to information and knowledge is an innovative mode of scholarly communication within the digital environment aimed at achievement of universal access to information and knowledge. While Open Access helps digital inclusion of citizens in developing countries by bringing within easy reach full-text contents of scholarly works, documentary heritage collections and development-related literature, the Digital Library remains a knowledge repository of such citizens, indigenous people, communities and institutions. Open Access to knowledge is a model adopted by many international and intergovernmental fora, such as the World Summit on the information Society (WSIS), for disseminating full-text contents to online communities.

The South Asia sub-region is now in the forefront of the Open Access movement within developing countries in the world, with India being the most prominent partner in terms of its successful Open Access and Digital Library initiatives. Institutional and policy frameworks in India also facilitate innovative solutions for increasing international visibility and accessibility of scholarly literature and documentary heritage in this country.

This publication has its genesis in the recommendations and proceedings of UNESCO-supported international conferences and workshops including the 4th International Conference of Asian Digital Libraries (ICADL2001, Bangalore); the International Conferences on Digital Libraries (ICDL2004 & ICDL2006, New Delhi); and the International Workshop on Greenstone Digital Library software (2006, Kozhikode), where many information professionals of this sub-region demonstrated their Digital Library and Open Access Initiatives. It discusses successful activities in the South Asia sub-region bringing closer to the worldwide audience, the subject of access to scholarly literature and documentary heritage. This may thus be considered an authoritative source-book on Open Access Development in this sub-region.

INTRODUCTION

In the information society, free flow of information is a fundamental principle for bridging the knowledge gaps between privileged and under-privileged communities. Social inclusion and economic empowerment are also achieved in a society where citizens have universal access to information and knowledge, ranging from public information to specialized or customized information related to ones' profession, vocation or culture. Open access to information and knowledge is a key contributor in provisioning universal access to information and knowledge. Thus, the open access movement is gaining momentum in developed countries which already have necessary information infrastructure.

The emerging economies amongst the developing countries are not far behind in building up necessary information infrastructure, essential for sustainable economic development. These emerging countries, however, have limitations in terms of bridging the digital divide within their societies, due to the co-existence of marginalized and privileged communities. With the availability of advanced information and communication technologies (ICTs) and by building up necessary information infrastructure in South Asia, particularly in India, this sub-region becomes an active contributor to global open access literature, a contribution, almost proportionate to its flow of scholarly literature through subscription-based channels. For several thousand years, South Asian literature has been developing, explicit with knowledge of the time.

Traditional knowledge, presently available amongst indigenous people in folklore or other forms, is now being explored and documented. The digitization of century-old publications and rare documents is being carried out in different institutions across this sub-region to preserve them and make them accessible through networks of digital archives. E-content is are being produced by members of different communities, facilitated by certain development organizations, including the apex higher education agencies (viz., University Grants Commission, India; Higher Education Council, Pakistan); apex research councils (e.g., Council of Scientific and Industrial Research, India; Indian Council of Medical Research, India), and grassroots-level civil society organizations (e.g., OneWorld South Asia). India has spearheaded the open access movement in developing countries since the last decade upscaling print-based scholarly journals into open access electronic journals, and establishing a number of open access repositories, both at national and institutional levels embracing free and open source software (FOSS). Establishment of open courseware and cross-archive search services are new fronts of open access initiatives.

Indian information professionals are experimenting with open source software in the establishment of institutional repository (IR) systems in local libraries, using Greenstone, DSpace or EPrints software. Once an IR is successfully implemented in the local library setup, it is then upscaled to institution-wide application through campus networks or intranet. Similarly, it may open up to wider audiences once the authorities of the institution are convinced. With the availability of dedicated information infrastructure combined with 24X7 broadband connectivity and the national educational grid, some institutions and universities created institutional repositories for wide dissemination of their own scholarly literature. Some open access repositories are specially created to diffuse intellectual outputs of the country in the form of electronic theses and dissertations: Vidyanidhi, ETD@IISc in India and the Pakistan Research Repository are examples. Other national level open access repositories provide all kinds of scholarly materials such as research papers, conference papers, technical reports, presentations, photographs, news clippings, and e-theses on particular disciplines. The OpenMED@NIC and Librarians' Digital Library are also examples of this kind.

In the wake of the open access movement, some policy frameworks have already been established by member communities to foster inclusive, plural and development-oriented knowledge societies. A number of open access declarations/ statements were made during the past decade, where the world's leading research institutions agreed on the open access mandates. An indicative list of major open access statements or declarations is given in Table 1. The United Nations-backed World Summit on the Information Society (WSIS) strongly supported open access to information and knowledge. This confirms that member countries of the United Nations will take appropriate strategic decisions to bring scholarly literature, produced from public funded research initiatives or state-supported researchers, under the umbrella of open access. Annexure illustrates the WSIS Declaration of Principles and Plan of Action on access to information and knowledge. The plan of action relevant to long-term preservation of cultural contents, creation of local content and open access to scholarly literature is also shown in Annexure.

The National Knowledge Commission of India (NKC), constituted on 13th June 2005, is a high-level advisory body to the Prime Minister of India, with a mandate to guide policy and direct reforms. NKC's overarching aim is to transform India into a vibrant knowledge-based society. The NKC's *Working Group on Open Access and Open Educational Resources* and *Working Group on Libraries* have strongly recommended open access to public-funded research literature and supported establishment of open courseware repositories for countrywide dissemination of quality courseware to many cross-sections of people. If implemented, these recommendations will have far-reaching implications in the knowledge creation and dissemination cycle. The scholarly literature and lifelong learning materials produced by state-sponsored institutions would then be made accessible through open access channels such as national and institutional repositories. This way the NKC's recommendation on peer-reviewed research papers resulting from public-funded research would be validated by subject experts when making these resources available through open access channels. NKC also recommended creation of national knowledge portals for basic needs/ key sectors such as water, energy, environment, education, food, health, agriculture,

employment and citizen rights. Already national portals on water (India Water Portal, www.indiawaterportal.org), energy (India Energy Portal, www.indiaenergyportal.org) and education (Sakshat, www.sakshat.ac.in) have been established that provide open access to information, knowledge and learning resources on the relevant areas.

Table 2: NKC Working Group on Open Access and Open Educational Resources - Recommendations

Encourage Open Access

“Open access material stimulates research and helps students, teachers and researchers across the world. Therefore at a policy level, all research articles published by Indian authors receiving substantial government or public funding must be made available under Open Access and should be archived in the standard OA format at least on his/her website. As a next step, a national academic OA portal should be developed. The government should allocate resources to increase the current digitization efforts of books and periodicals which are outside copyright protection. Separate funding should be allocated to develop a new high quality OCR software package so that new and old fonts in many different Indian languages can be converted into ISCI/ASCII code and OA portals and servers could be upgraded regularly. Appropriate financial resources should be earmarked for these endeavours. This will also facilitate machine translation of these valuable resources.”

http://knowledgecommission.gov.in/downloads/documents/wg_open_course.pdf

Table 3: NKC Working Group on Libraries Recommendations

Digitization and Open Access

To enable equitable and universal access to knowledge resources, it is important to create more digital resources which can be shared. The concept of an “information commons” i.e. “resources shared by a community of producers and consumers in an open access environment” needs to be promoted. New resources should be openly accessible and historical documents, too, should be digitized and made available.

- This Working Group strongly recommends that peer-reviewed published research papers resulting from publicly funded research in India must be made available through open access channels, subject to copyright regulations. The group also recommends use of open standards and free and open source software.
- All pre-independence periodicals and newspapers in all Indian languages and in English must be digitized for access and preservation.

To help preserve digital resources, optimize their use and avoid duplication of effort:

- State-level archives for preservation of digitized materials must be set up.
- Every State should establish a registry and archives of knowledge-based digital resources, and make it accessible.

http://knowledgecommission.gov.in/downloads/documents/wg_lib.pdf

In 2005, the University Grants Commission of India (UGC) drafted a national policy framework entitled “UGC (Submission of Metadata and Full-text of Doctoral Theses in Electronic Format) Regulations, 2005”. This Regulation proposed two sets of planned actions, such as:

- Creation of Indian National Theses Database (INTED)
- Submission of PhD Theses in Electronic Form

This set of regulations is still under consideration. They propose to formulate a roadmap to achieve widest dissemination of results of doctoral research conducted in Indian universities and bibliographic control of theses and dissertations of research degrees. So far, a few UGC-supported universities have established open access repositories for scholarly literature produced in the respective universities. Initially the universities were reluctant to change their status quo, as the contents of scholarly literature including the PhD theses will be a matter of critical analysis by the national and international peers, if the universities establish open access repositories. Now, universities will be motivated to produce qualitative doctoral theses and will maintain certain international standards. The UGC also supports development of infrastructure in Indian universities through various planned schemes. The proposed national education grid will also enrich modern ICT infrastructure in Indian universities. The Indian universities then will have necessary infrastructure to host a number of web-based information services. Hosting an ETD repository and providing online interface to INTED will not be a problem in most of the universities. Indian universities should now take a proactive role in the implementation of these regulations at the earliest, ensure qualitative research and make the results of doctoral research widely available. The UGC should also clear all bottlenecks to implement INTED and decentralized ETD repositories across the country.

Similarly, the Higher Education Commission (HEC) of Pakistan, a counterpart of India's UGC, is now supporting open access to public-funded scholarly literature, particularly theses and dissertations. HEC has established the Pakistan Research Repository to promote international visibility of research originating from institutes of higher education in Pakistan. This repository has already made the full-text of over 1600 doctoral theses available in high-quality digitized format.

On the other hand, development practitioners working in civil society organizations or development agencies are now in the forefront of e-content creation and facilitating e-content generation at the grassroots level. Some of the major challenges faced by them are long-term preservation of e-content, and establishing an efficient storage and retrieval system to render these resources open access in networked environments. Free and open source software for digital archiving such as Greenstone, DSpace, EPrints and GENISIS, are very efficient in handling these issues.

In South Asia, particularly in India, large volumes of cultural heritage resources (documentary) are on the verge of extinction due to lack of preservation, non-availability, rarity and natural decay. The knowledge and wisdom lost from these cultural heritage documentary resources can cause a severe

vacuum in the intellectual wealth of humanity, if we cannot preserve them at this critical juncture. With the emergence of successful digital library projects in more developed countries, the public institutions in this region opted for long-term preservation of this wealth of knowledge through digitization projects and digital library initiatives. Diverse multi-cultural and multilingual contents are now being documented, preserved and made available through the internationally acclaimed digital library initiatives such as Digital Library of India (DLI), Traditional Knowledge Digital Library (TKDL), Kalasampada Digital Library-Resource for Indian Cultural Heritage (DL-RICH), Muktabodha Digital Library, Archives of Indian Labours, and United Nations Digital Library in Islamabad, and AHKRC Digital Library.

This book therefore strives to illustrate South Asian initiatives on open access to information and knowledge. Some of the common open access channels found in this sub-region are digital libraries, open access journals, institutional repositories, national-level repositories, open courseware, metadata harvesting services, etc. Most of the open access initiatives are supported by government bodies or public institutions, followed by non-profit making organizations.

DIGITAL LIBRARY INITIATIVES

AHKRC Digital Library

Type of Initiative: Digital Library

Principal Implementing Agency: Akhter Hameed Khan Resource Center (AHKRC), Islamabad, Pakistan

Supporting Agencies: National Rural Support Programme (NRSP), Islamabad; NRSP Institute of Rural Management, Islamabad, Pakistan

Software Used: Greenstone Digital Library Software

Web Address 1: <http://www.lisolutions.org/gsdli/cgi-bin/library.exe>

Web Address 2: <http://210.56.25.21/gsdli/cgi-bin/library.exe>

Brief Description:

AHKRC Digital Library is an open access digital archive, named after Dr. Akhter Hameed Khan, an outstanding development activist and social scientist from Pakistan. This digital archive provides full-text access to some important works of Akhter Hameed Khan and Shoaib Sultan Khan, publications of National Rural Support Programme (NRSP) and digital images of the activities of NRSP/AHKRC. This repository also provides access to some selected journals and reports to the registered users.

Archives of Indian Labour: Integrated Labour History Research Programme

Type of Initiative: Digital Library

Principal Implementing Agency: V.V. Giri National Labour Institute, Noida

Participating Institutions: Association of Indian Labour Historians, Delhi; N. M. Joshi Centre for Labour Research and Education; Workers' Education Trust, Chennai; Roja Muthiah Research Library, Chennai; SARAI- A New Media Initiative, Center for Study of Developing Societies, New Delhi

Supporting Agency: Ministry of Labour, Government of India

Software Used: Greenstone Digital Library Software

Web Address: <http://www.indialabourarchives.org/>

Brief Description:

The Archives of Indian Labour (AIL) is a collaborative project of V.V. Giri National Labour Institute and the Association of Indian Labour Historians. AIL aims at preserving and making accessible archival documents on the working class of India to the people. Inaugurated on International Labour Day, 1st May 2002, this project is dedicated to the proud heritage of the Indian working class. It is a part of the Integrated Labour History Research Programme, which focuses on integrating and initiating research on labour history and is perhaps the first of its kind in the country. This portal is a gateway to the rich primary source materials relating to the labour history of south Asian region. AIL integrates historical and contemporary records on the Indian labour movement, industrial relations, trade unions, commission reports, and others, generated by the state and the business enterprises. Other materials such as personal narratives, video and audio materials related to labour have also been preserved in the Archives. AIL consists of several sets of archival collections such as All India Trade Union Congress (1928-96), Bharatiya Mazdoor Sangh, Bombay Textile Strike (1982), Documentary Sources of Labour History in Tamil Nadu, Oral History Documentation of Industrial Closure in Delhi, Second National Commission on Labour (2002), Commissions on Labour (1931-2002), Community-Based Garment Industry in 24 Parganas (South) of West Bengal, Labour Struggle in Bhilai (1990-2004), Oral History of the Labour Movement in India, SEWA: Bidi Workers of Ahmedabad City, Textile Labour in Ahmedabad, and Un-organised Workers of Delhi and The Seven Day Strike (1988). Its special collections are on key events in India's labour history. AIL has four thematic collections, i.e. Trade Union Collections, Oral History Collections, Regional Collections, and Strike Collections. AIL uses Greenstone digital library software for content organization and dissemination. When a search query is entered in this portal, the search engine retrieves documents that match some or all of the words from the entire books, or chapters, or section titles. Then it displays the search result with a link to each document. AIL also has a collection map that helps in navigating different collections. The collection preferences, search preferences and presentation preferences also help users to access the archived documents conveniently.

Figure 1: Customization of AIL through Collection, Presentation and Search Preferences

Trafficking (general studies, country reports) - India

Asian Development Bank (ADB). (2002). **Combating Trafficking of Women and Children in South Asia, Country Paper** (India), 53 p. Analysis of the ADB's Regional Technical Assistance (RTA) in India.
http://www.adb.org/pubs/traff_india.pdf
[Click here to download the document](#) (Filesize: 1708 kb) 

Blanchet, T. et al. (2003). **Bangladeshi girls sold as wives in North India**, 53 p. "The report is based on the study of 112 Bangladeshi girls and women who were purchased to serve as wives to men of Uttar Pradesh or other parts of North India. In most cases, parents had consented to the marriage but were not sure of the sale. The obligation to marry a daughter early and the impossibility for poor parents to meet dowry demands were the main push factors."

[Click here to download the document](#) (Filesize: 241 kb) 

Type of Initiative: Digital Library

Principal Implementing Institution: Terre des Hommes in Nepal

Participating Institutions: UNICEF; and the International Labour Organisation (ILO)

Supporting Agency: The Swiss Foundation of Terre des Hommes (Tdh), Switzerland;
International Federation Terre des Hommes (IFTDH), Switzerland

Web Address: <http://www.ChildTrafficking.com>

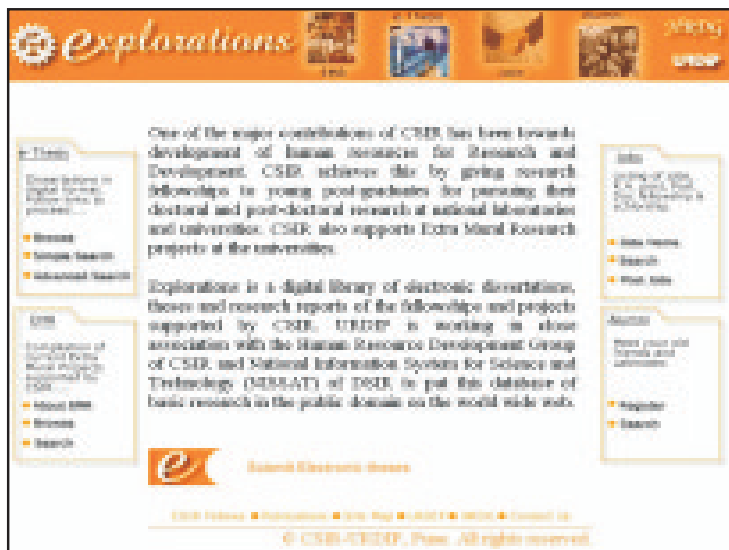

Allied Project: International Campaign against Child Trafficking
<http://www.stopchildtrafficking.org>

Brief Description:

Child trafficking is a menace in developing countries, particularly in South Asian sub-region. Child trafficking is linked to poverty, illiteracy, lack of livelihood options and limited access to social securities. Although some developing countries have legal frameworks to address the problem of child trafficking, comprehensive implementation strategies are also needed in the society. The movement of trafficked children from less developed countries to developed countries can also be checked, if the developed countries take appropriate action. International and national agencies, local bodies and civil society organizations join hands to work together with marginalized communities at the grassroots level to combat this intense problem, particularly where traffickers are more organized. In October 2001, Terre des Hommes launched an international campaign, called 'Stop Child Trafficking' which gained momentum in this region. The campaign is run together with local partners by regional coordinators and delegates in 33 countries of the six regions, i.e. Europe, Southeast Asia, South Asia, Southern Africa, South America and Western Africa. Over the last two decades, anti-trafficking organizations and individuals all over the world have clarified issues, conducted research, developed strategies and carried out interventions.

The Child Trafficking Digital Library is a global internet platform for sharing the accumulated knowledge, skills and experience on child trafficking. This repository provides access to archived documentary resources in the areas of trafficking, legal framework, source side, destination side, repatriation, care and support, reintegration, migration, related topics, sex work, HIV/AIDS, research considerations, protection and ethics. Apart from publications, there are documents and reports on child trafficking. This repository is referral to related resources such as discussions, bibliographies, website links, and photo galleries. This platform gets updated on a regular basis.

CSIR Explorations

Type of Initiative: Digital Library

Principal Implementing Agency: CSIR Unit for Research and Development of Information Products (URDIP) at Pune

Supporting Agency: Council of Scientific and Industrial Research (CSIR), Government of India

Web Address: <http://csirexplorations.com/>

Allied Projects:

- PATESTATE: A Database of CSIR Patents <http://www.patestate.com>
- DSpace at National Chemical Laboratory <http://dspace.ncl.res.in/dspace/>
- Comprehensive Traditional Knowledge Digital Documentation and Library http://www.csir.res.in/External/Heads/aboutcsir/network_projects.htm
- National Science Digital Library http://www.csir.res.in/External/Heads/aboutcsir/network_projects.htm

Brief Description:

The CSIR *Explorations* is a digital library of electronic dissertations, theses and research reports of the fellowships and projects supported by CSIR. Presently, Explorations consists of three bibliographic databases, namely, E-Thesis, EMR (Extramural Research) and CSIR Publications. E-Thesis database is an authoritative source for information about doctoral theses and dissertations, submitted in Indian universities by researchers who availed CSIR Junior Research Fellowships (JRF) or Senior Research Fellowships (SRF). CSIR fellows carry out their research work in over 250 national laboratories, universities and research institutes in India. This database is popularly

used by doctoral candidates, faculty members and scientists who would like to know the topics of completed research by past research fellows. At the time of submission of a PhD thesis in an Indian university, the CSIR research fellow submits an electronic copy on CD-ROM to URDIP along with a descriptive set of metadata for inclusion in this online database. The research fellow receives a token financial grant (INR 3000.00, about US\$ 75.00) to recover the cost of creation of the CD-ROM. As CSIR is the largest supporter of doctoral research work in the country, URDIP in association with Human Resources Development Group (HRDG) of CSIR is creating a digital library of CSIR-supported PhD Theses in the 11th Plan period (2007-2012) of the country. The existing CSIR *e-Thesis* bibliographic database will be scaled up as a full-text ETD (electronic theses and dissertations) repository for this purpose.

The *EMR* (Extramural Research) is another online database available in Explorations. The CSIR provides financial assistance to academic and research institutions in India to promote research in all the areas of science and technology including agriculture, engineering and medicine. The extramural assistance is provided by way of grants to professors, experts and scientists working in Indian universities, postgraduate institutions, R&D laboratories, both in public and private sectors. Research proposals of basic and applied nature which attempt to solve specific problems proposed by CSIR laboratories or in newer and complementary fields are considered for CSIR support. The EMR database in Explorations provides access to results of such research projects.

The *CSIR Publications* is another online bibliographic database available within Explorations. It consists of research papers published by scientists and research fellows working in thirty-eight laboratories of CSIR. The CSIR laboratories also collaborate with government departments, government agencies and corporate bodies by undertaking research projects supported by such external agencies. The research results of these externally-supported as well as in-house research projects, are published as journal articles, conference papers and technical reports. The publications are systematically archived in this database.

E-Thesis and EMR provide a hyperlink to information on research papers and patents derived from each individual thesis or project report. This link is a unique option that facilitates navigation of

- National Mission for Manuscripts www.namami.org; <http://namami.nic.in>
- Kritisampada: National Database of Manuscripts
<http://www.namami.org/pdatabase.aspx>

Brief Description:

IGNCA has established another digital library on indigenous cultural heritage, i.e. the Cultural Heritage Digital Library in Hindi (CHDLH). This digital library has been developed under the auspices of the Content Development and IT Localization Network (CoIL-Net) programme with special focus on the Hindi-speaking region in India. CHDLH disseminates information and traditional knowledge related to:

- common heritage of the people;
- poetic and literary heritage;
- architectural heritage;
- natural heritage; and
- miscellaneous information related to other areas of arts, aesthetics and culture.

CHDLH also provides access to varieties of textual, graphical and multimedia digital resources, almost the same as documents available in DL-RICH, but localized in Hindi language.

Similar to DL-RICH, CHDLH provides browsing facilities through the hyper-linked index in the main page, index to thematic categories, and index to geographic categories. CHDLH does not have a search facility. The contents of CHDLH are developed mainly in Hindi and displayed in Devanagari scripts using Unicode.

Digital e-Library (Dware Dware Gyan Sampadaa/ Providing Books at Your Doorsteps)

Figure 2: Mobile Van Reaching the Un-reached with Multilingual Digital Library Contents

Type of Initiative: Mobile Digital Library

Implementing Agency: Centre for Development of Advanced Computing, Noida (CDAC Noida)

Supporting Agency: Ministry of Communications and Information Technology, Government of India

Partner Institutions: Shri Shivanand, Sasta Sahitya Mandal, Digital Library of India

Web Address (English): <http://mobilelibrary.cdacnoida.in>

Web Address (Hindi): <http://mobilelibrary.cdacnoida.in/indexHindi.html>

Allied Projects:

- Digital Library of India <http://www.dli.cdacnoida.in/>
- Cultural Heritage Digital Library in Hindi
<http://tdil.mit.gov.in/coilnet/ignca/welcome.html>
- Technology Development for Indian Languages Programme (TDIL)
<http://tdil.mit.gov.in/>
- Content Development and IT Localisation Network Programme (CoIL-NET)
<http://tdil.mit.gov.in/coilnet.htm>

Brief Description:

The Centre for Development of Advanced Computing, Noida (CDAC Noida) has initiated a mission-mode project in bringing the one million books, available with the Digital Library of India portals, to the doorsteps of common citizens. Its Mission is “Internet enabled Mobile Digital Library brought to use of the common citizen for promoting literacy”. Different places such as schools in villages and other remote areas are covered under this programme to promote literacy and demonstrate the use of technology for masses, particularly in close proximity to the National Capital Region (NCR) and in particular states in northern and central India such as Delhi, Uttar Pradesh, Haryana, Madhya Pradesh, Himanchal Pradesh, Uttarakhand, Punjab, Rajasthan, and Bihar. The schools, adult learning centres, public libraries or local panchayats can invite this mobile digital library for accessing resources and services attached with the mobile unit. This initiative makes use of a mobile van with satellite connection for Internet connectivity. The van is fitted with necessary accessories for providing bound books to the end user from a single point. The mobile van is equipped with:

- Dish Antenna for Internet Connectivity
- Multimedia Laptop
- Laser Printer
- Scorer and Cutter
- Automatic Book Binder

Other than books available in Digital Library of India portals, some full-text e-books are also made available locally and in its portal in either one of DJVU, PDF and DOC formats. Some of the books are meant for neo-literates in spreading functional literary and lifelong learning in remote areas. The locally available e-books are written in Hindi language, as this initiative is covered in Hindi-speaking states only.

Digital Library of India

The screenshot shows the Digital Library of India website. At the top, there is a navigation bar with links like Home, About, etc. The main header displays the 'Digital Library of India' logo and text, mentioning its affiliation with the Indian Institute of Science, Bangalore. The central part of the page is a search and navigation interface. On the left, there are search filters for Title, Author, Year, Subject, Language, and Country. On the right, there is a large 'DLI' logo and a list of categories: Books, Journals, Newspapers, and Manuscripts. Below these categories, there are search filters for Title, Author's Last Name, Year, and Subject. The interface is designed to help users find digital resources across various subjects and formats.

Type of Initiative: Digital Library

Principal Implementing Agency: Indian Institute of Science (IISc), Bangalore

Mega Scanning Centres: Indian Institute of Information Technology Hyderabad (IIIT Hyderabad); Centre for Development of Advanced Computing, Noida (CDAC Noida); Centre for Development of Advanced Computing, Kolkata (CDAC Kolkata)

Participating Institutions: Indian Institute of Information Technology Hyderabad; ERNET (Education and Research Network) India; Centre for Development of Advanced Computing (CDAC)

Brief Description:

The Digital Library of India (DLI) is the greatest digital library initiative in South Asia, spreading all over the country and establishing a network of four mega scanning centres and 21 scanning centres, which feed the digital contents into the digital library systems. Dr. A.P.J. Abdul Kalam, the former President of India, launched portal of Digital Library of India on 8th September, 2003. DLI is a part of the Universal Digital Library (UDL) and Million Books Project, coordinated by the Carnegie Mellon University, USA. Although the original UDL project has already been concluded, the DLI project still ripples around with much acclamation, since the Ministry of Communications and Information Technology is supporting it. In this project, the former President of India is also personally interested, and provides digital content of his own writings. The Library of the honourable President's house is one of the scanning centres for DLI projects, where many invaluable rare books are being digitised. Presently DLI is available in three portals, hosted in three cities, i.e. Bangalore, Hyderabad and Noida. This initiative has become a test bed for many Indian language technology researches including the development of machine translation systems, optical character recognition (OCR) systems, summarizers, text-to-speech (TTS) systems and so on. DLI is also a huge repository for all major Indian languages, where many Indian language classics published before 1900 are freely available to global readers. The multilingual feature of this initiative is one of the strongest attributes for worldwide success of this project. Table 5 shows language-wise distribution of documents in DLI portal, hosted by IISc Bangalore. It shows that English language ranks first both in 2007 and 2006, whereas Telugu is ranks second and Hindi third in the consecutive years. It also shows that the books written in the top five languages, viz. English, Telugu, Hindi, Sanskrit and Urdu, cover more than ninety percent of the total available in this portal.

The structured metadata of scanned documents is created in the scanning centres of DLI, uploaded to DLI portals, and later searchable metadata provides access to full-text contents. DLI provides access to its resources through its search interface and browsing interface, available on the main page. The documents of DLI can be browsed by title of document (beginning alphabet to be chosen); author's last name (beginning alphabet to be chosen); range of years; subject; language; or name of scanning centre. Using a search interface available in the main page, the documents of DLI can be searched by the title of the document, name of author, subject, year, language, name of scanning centre, scanning location, name of vendor, or name of source library, if any of these

metadata elements are known. Two or more parameters can be given in a search query, and it will lead to the use of the Boolean operator AND. Other Boolean operators like OR, and NOT usually cannot be used in this search interface. The search result is displayed in the same window that lists the matched documents with the given query in multiple pages. Administrative and descriptive metadata is then displayed, when the user selects a particular document. The user can then browse the document page by page, either in image format (TIFF, GIF), or in text format (TXT, RTF, HTML, if the document is written in an European language).

Table 6 provides ranks of scanning centres based on their contribution to DLI project and in making digitized documents available in the DLI portal. This Table also shows that the Indian Institute of Information Technology, Allahabad; City Central Library, Hyderabad; Regional Mega Scanning Centre in the International Institute of Information Technology, Hyderabad; Tirumala Tirupati Devasthanams, Tirupati; and Arulmigu Kalasligam College of Engineering (AKCE), Madurai are the top five contributors to the DLI portal and accounted for 62.8 percent of total books available. Table 6 also indicates that some scanning centres have discontinued/ completed digitization works. Thus, the infrastructure, expertise and capacity developed in these scanning centres are now unutilized or under-utilized.

Table 5: Language-wise Distribution of Books in DLI Portal

Language	As on 24 Nov 2007			As on 10 Oct 2006		
	2007 Rank	No. of Books	No. of Pages	2006 Rank	No. of Books	No. of Pages

HEC - National Digital Library

The screenshot shows the HEC - National Digital Library website. The header includes navigation links: HOME, ABOUT AND SERVICES, SERVICES / FEATURES, INSTITUTIONS, CONTACT US, ABOUT OUR LIBRARY, and CONTACTS. The main content area features the HEC logo and the title 'HEC - National Digital Library'. A central text block states: 'A programme to provide researchers within public and private universities in Pakistan and non-profit research and development organizations with access to international scholarly literature based on electronic (online) delivery, providing access to high quality, peer-reviewed journals, databases, articles and e-Books across a wide range of disciplines.' Below this, it highlights '40,000 e-Books' and 'One eContent Platform'. A section titled 'The Higher Education Commission (HEC) has launched library to provide 40,000 online books in addition to 20,000 journals that have been made available through the Digital Library Programme. The e-books support programme will allow researchers to access most of the important text and reference books electronically in a variety of subject areas.' To the right, there is a 'British Library' partnership announcement: 'National Library of UK! Available to all the Digital Library Registered Institutes!! For information click here'. The bottom section contains 'Quick Links' for 'What is HEC?', 'Eligibility Criteria', and 'Terms & Conditions'; 'Journal Citation Reports 2006' with a note that the 'JCR Science Edition contains data from over 5,900 journals in 170 different disciplines'; and 'Useful Links' for 'PhD Research Repository' and 'IEEE Computer Society'.

Type of Initiative: Digital Library

Principal Implementing Agency: Higher Education Commission, Pakistan

Supporting Agencies: Higher Education Commission, Government of Pakistan

Participating/ Supporting Agencies (Overseas): International Network for the Availability of Scientific Publications (INASP), UK; eBrary, USA; British Library, UK

Web Address: <http://www.digitallibrary.edu.pk/>

Allied Project: Pakistan Research Repository (PRR) www.eprints.hec.gov.pk

Brief Description:

The Higher Education Commission (HEC) is an apex body for the higher education system in Pakistan that forges the transformation of indigenous universities in Pakistan into a world-class centre of education, research and development. Through facilitating this process, the HEC is spearheading the building of a knowledge-based economy in Pakistan. HEC-National Digital

Library is a national programme to strengthen access to subscription-based scholarly literature and databases, where every researcher attached to a private/public sector university or non-profit research institution gets online access to international scholarly literature, such as, high quality peer-reviewed journals, online databases and e-books across a wide range of disciplines. HEC has launched *Ebrary* to provide 40,000 online books in addition to 23,000 journals that have been made available through this Digital Library Programme. The e-books support programme allows researchers to access most of the important text and reference books electronically in a variety of subject areas. This follows consortia-based subscription model, where the Government of Pakistan in collaboration with some international agencies, generously supports this programme. HEC also promotes open access to public-funded research results through its Pakistan Research Repository.

Web Address 2: <http://xxx.imsc.res.in/> (Hosted by IMSc, Chennai)

Web Address 3: <http://www.arxiv.org/> (Hosted by Cornell University Library, USA)

Brief Description:

The Institute of Mathematical Sciences (IMSc), founded by Alladi Ramakrishnan in 1962, is a national institution for fundamental research in the area of mathematical and physical sciences. Since 1997, IMSc hosts a mirror site of the arXiv, a resourceful open access archive in the fields of physics, mathematics, non-linear science, computer science, quantitative biology and statistics, developed by Cornell University Library. The researchers across the world are responsible for phenomenal growth of this digital archive through submission of their own research publications. The contents of arXiv conform to academic standards, as set out by Cornell University, USA. It is owned, operated and funded by Cornell University, a private not-for-profit educational institution. It is also partially funded by the National Science Foundation in collaboration with local support from the Institute of Mathematical Sciences, Chennai. Thus, IMSc became the pioneer in open access archiving in India, although having limited storage capacity and bandwidth connectivity at that point of time. This repository is compliant to OAI-PMH (Protocol for Metadata Harvesting) and indexed in the OAIster, Google Scholar, OpenDOAR (Directory of Open Access Repositories) and other harvesters.

India Education Digital Library

Figure 3: India Education Digital Library – Telugu Interface

Type of Initiative: Digital Library

Principal Implementing Agency: Education Development Center (EDC), Bangalore

Participating Institutions (Indian): International School of Information Management (iSIM), University of Mysore; National Informatics Centre, Karnataka

Supporting Agency (Overseas): United States Agency for International Development (USAID)

Software Used: Greenstone Digital Library Software

Web Address: <http://www.edudl.gov.in/>

Brief Description:

The India Education Digital Library, hosted by the National Informatics Centre in Bangalore and designed by the International School of Information Management (iSIM) team, is a Greenstone-based digital library. It comprises multimedia tools for teaching, learning and training. This was initially developed as an online multilingual digital library available in three languages - English, Kannada or Hindi. Later, a CD-ROM version was developed having identical digital resources, as available in online version. The main focus of this digital library is the government-aided primary and secondary schools in India. The digital library consists of 450 radio programmes, video films and learning contents. The contents in the digital library cater to students studying in classes I to VIII in the subjects of mathematics, social studies, sciences, environmental science and languages such as English, Hindi and Kannada. Azim Premji Foundation (APF), Confederation of Indian Industry (CII) Shiksha, Directorate of State Education Research and Training (DSERT) Karnataka, Digital Study Hall and EDC have provided content to the digital library. Users of this digital library can search the website for content by the keyword, subject, title, language, audience and type of media. Afterwards they can directly access searched contents from the website.

Indian National Digital Library in Engineering Sciences and Technology (INDEST) Consortium

The screenshot shows the homepage of the INDEST-AICTE Consortium. The header includes the INDEST logo and the text 'Indian National Digital Library in Engineering Sciences & Technology' with the tagline 'Empowering People and Resources'. A navigation menu is on the left. The main content area features a central banner with the text 'Welcome to INDEST-AICTE Consortium Website' and two circular graphics labeled 'enable access' and 'desktop access'. Below this, there are statistics for 'enable access' and 'desktop access', and a 'Member Login for Single Institution' button. The right sidebar contains a search bar and a list of links including 'Home', 'About', 'Events Calendar', and 'Contact Us'. The footer contains copyright information and contact details.

Kalasampada: Digital Library - Resources of Indian Cultural Heritage (DL-RICH)

Type of Initiative: Digital Library

Implementing Agency: Cultural Informatics Laboratory, Indira Gandhi National Centre for the Arts (IGNCA), New Delhi, India

Supporting Agency: Ministry of Communications and Information Technology, Government of India

Web Address: <http://www.ignca.nic.in/dlrich.html>

Allied Projects:

- Cultural Heritage Digital Library in Hindi
<http://tdil.mit.gov.in/coilnet/ignca/welcome.html>
- Technology Development for Indian Languages Programme (TDIL)
<http://tdil.mit.gov.in/>
- Content Development and IT Localisation Network Programme (CoIL-NET)
<http://tdil.mit.gov.in/coilnet.htm>

- National Mission for Manuscripts www.namami.org; <http://namami.nic.in>
- Kritisampada: National Database of Manuscripts
<http://www.namami.org/pdatabase.aspx>

Brief Description:

The Indira Gandhi National Centre for the Arts (IGNCA) has established a digital library on indigenous cultural heritage, i.e. 'Kalasampada: Digital Library Resource for Indian Cultural Heritage' (DL-RICH) with the support from India's Ministry of Communications and Information Technology. Since its inception, DL-RICH is recognized as a reference databank for cultural heritage of India to encompass and preserve the distributed fragments of Indian arts, aesthetics and culture. This huge knowledge base helps the scholars to explore and visualize the information stored in multiple layers. DL-RICH provides online access to digital images of cultural heritage resources such as manuscripts, rare photographs, rare books, rare painting, sculptures, handicrafts, monuments, artifacts, festivals, as well as varieties of textual, graphical, audio-visual and multimedia resources. Kalasampada received the 'Golden Icon: Award for Exemplary Implementation for e-Governance Initiatives' under the category, Best Documented Knowledge and case study, given by India's Department of Administrative Reforms and Public Grievances in 2005. It hosts a Sanskrit text repository, called Gaudiya Grantha Mandira, that covers more than 400 chapters from different oriental texts. The digital corpus in this knowledge base includes over 0.5 million folios of manuscripts, slides, digitized photographs, IGNCA published books, periodicals 'Kalakalp' and 'Vihangama', over 400 hours of audio and video, and approximately 50 walkthroughs. Some of the documents in the collections are not available to the open access domain due to copyright restrictions.

DL-RICH can be navigated through the hyper-linked indexes in the main page, thematic categories, and, geographic categories. The index to thematic categories gives further links to documents pertaining to literature, personalities, catalogues, performances, studies, events, heritage, collections, religious categories, etc. The index to geographic categories gives further links to states and union territories of India, and other countries. Although DL-RICH does not provide a comprehensive search facility, user-friendly interfaces in this portal make navigation convenient to the general users.

Muktabodha: Digital Library and Archiving Project

Type of Initiative: Digital Library

Principal Implementing Agency: Muktabodha Indological Research Institute, New Delhi

Participating Institution (Indian): French Institute of Pondicherry (IFP)

Participating Institution (Overseas): Ecole française d'Extrême-Orient (EFEO)

Supporting Agency (Overseas): SYDA Foundation, USA

Web Address 1: http://www.muktabodhalib.org/digital_library.htm

Web Address 2: http://www.muktabodhalib.org/SECURE/digital_library_index.htm

Figure 5: Information Brochure of the Shaiva Manuscripts of Pondicherry, an inscription on the Memory of the World Register

Figure 6: Paper Transcripts of Shaiva Manuscripts of Pondicherry in Muktabodha Collection

Brief Description:

The Muktabodha Digital Library and Archiving Project is an important indigenous digital library project in India initiated by Muktabodha Indological Research Institute in July 2003. This digital library is open access to the public for non-commercial purposes only. It is functioning as a source of Indological texts for individual scholars and institutions across the world that makes available core texts of oriental literature. Muktabodha plans to make this digital library a repository of core texts of different branches of Shaivism. Muktabodha collaborates with other oriental research institutions in India for digitizing their rare books and manuscripts, which have been added here in phases.

Although this digital library does not provide a comprehensive search facility, Muktabodha provides easy browsing facilities for its core online collections by the hyper-linked indexes, such as title of texts, name of authors or commentators, and volume number. Then the chapters of each volume will appear followed by the main texts in Sanskrit or English. The Sanskrit text may contain digitized images of pages. Some texts of this collection are available in DjVu or PDF format.

The online collections of Muktabodha are briefly described below:

- Paper Transcripts of Shaiva Siddhanta, from the French Institute of Pondicherry (inscribed on UNESCO Memory of the World Register), having collection size over 210,000 digitized pages in over 2,000 texts. User registration is required for online access of this special collection.
 - Vedic Manuscripts of Gokarna (palm-leaf manuscripts in Grantha script)
 - Devakottai Series (24 volumes of the Shaiva Siddhanta Paripalana Sangha Devakottai Series mostly in the South Indian scripts)
 - Tantric searchable e-texts from different printed editions
 - Kashmir Series of Texts and Studies (75 volumes texts of the Kashmir Shaivism)
-

Traditional Knowledge Digital Library

Type of Initiative: Digital Library

Principal Implementing Agency: National Institute of Science Communication and Information Resources (NISCAIR), Council of Scientific and Industrial Research (CSIR), New Delhi

Participating Institutions: Council of Scientific and Industrial Research (CSIR), Ministry of Science and Technology, Government of India; Controller General of Patents Designs and Trademarks, Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India; SAARC Documentation Centre, India

Supporting Agency: Department of Ayurveda, Yoga, Naturopathy, Unani, Siddha and Homoeopathy (AYUSH), Ministry of Health and Family Welfare, Government of India

Web Address: www.tkdل.res.in

Allied Projects:

- National Science Digital Library; Comprehensive Traditional Knowledge Digital Documentation and Library
http://www.csir.res.in/External/Heads/aboutcsir/network_projects.htm
- CSIR E-Journals Consortium <http://202.54.99.7/ejournal/ejournalhome1.htm>
- National Science Digital Library
http://www.csir.res.in/External/Heads/aboutcsir/network_projects.htm

Brief Description:

The Traditional Knowledge Digital Library (TKDL) is well-known Indian digital library initiative, being implemented by the National Institute of Science Communication and Information Resources (NISCAIR). TKDL aims at preventing the misappropriation of traditional knowledge of India and some other south Asian countries through an appropriate arrangement with national and foreign patent offices. TKDL is available in five official languages of the United Nations, namely, English, Japanese, German, French and Spanish. TKDL targets codified information on the Indian systems of medicine, namely, Ayurveda, Unani, Siddha, Yoga, Naturopathy, and tribal medicine. TKDL has already documented traditional medicinal formulations comprising 13 million A4 size pages of data on transcribed 62,000 formulations in Ayurveda, 60,000 formulations in Unani, and 1,300 formulations in Siddha. TKDL is now documenting more formulations from different Ayurvedic, Unani and Siddha texts, whereas formulations from other Indian systems of medicine, e.g. Yoga, Naturopathy, tribal medicine, etc. will be added in near future.

At the core of the TKDL project is the innovative approach in the form of Traditional Knowledge Resource Classification (TKRC) that enables structured classification for the purpose of systematic arrangement, dissemination and retrieval of formulations described in classical texts of Ayurveda, Unani and Siddha, into patent compatible format compatible to the International Patent Classification (IPC) code. TKRC has been evolved for about 5000 sub-groups against earlier one sub-group in International Patent Classification. The TKDL provides different kinds of searching facilities such as simple search, advance search and advance query. Simple search lets the user search on the exact keyword. Advance search lets the user search by any element like keyword, title, International Patent Classification (IPC) code, name of disease, etc. Boolean operators like AND, OR, NOT, NEAR can also be used for combination of search terms. It also allows entering queries

with left and right truncation, using asterisks in front or in the end of the word, phrase, Sanskrit name, etc. An Advance query lets the user search by any or more than one key terms as the keyword, IPC code, title, bibliographic reference, or name of disease, then restrict the display of the search results. TKRC can be navigated from the section to subgroup (Section>Class>Subclass>Group>Subgroup). Each formulation is displayed in a page, titled “Key attributes of TKDL,” with attributes like formulation number, title of traditional knowledge resource, knowledge known since which year, TKRC code, IPC code, details of process / formulation, list of documents with date of publication (prior art). This page gives links to actual citation/slokas (prior art) and images of compositions.

TKDL has been receiving wide international coverage. This has been publicized most as compared to other digital library initiatives in India. TKDL is widely acknowledged by the World Intellectual Property Organization (WIPO) and its member countries. The International Patent Offices have direct access to TKDL for preventing the misappropriation of traditional knowledge of India. The SAARC Documentation Centre in New Delhi is also currently engaged in the establishment of TKDL for SAARC nations.

Figure 7: TKDL User Manual

United Nations Digital Library, Islamabad, Pakistan

Type of Initiative: Digital Library

Principal Implementing Agency: United Nations Common Library, United Nations Information Center (UNIC), Islamabad, Pakistan

Supporting Agencies: United Nations Organizations in Pakistan

Software Used: Greenstone Digital Library Software

Web Address: <http://library.un.org.pk/gsdsl/cgi-bin/library.exe>

Brief Description:

The United Nations Digital Library is an online repository of the full-text digital documents of the various United Nations agencies, Programmes and Funds, having country offices in Pakistan. This is part of United Nations Common Library in Pakistan that systematically facilitates the retention and long-term preservation of UN documents, in a usable form. The collection of this digital library comprises the general documents, reports, publications, newsletters, press releases and other public information items. This portal offers an efficient browsing and searching facility and easy access to required information. The online collection can be navigated by 21 broad subject headings, names of UN agencies, keywords, and titles of the documents. This archive also has facility of full-text searching, and can be searched by title of document, document sections, section titles, keyword, organization and subject. The UN agencies and their partner organizations are continuously archiving their publications and key documents on development issues in this repository to showcase, share and preserve their published works as well as disseminate them in much faster, easier, more varied ways, to a wider range of audience.

Vidyanidhi

Vidyanidhi
Digital Library & E-Scholarship Portal @ University of Mysore

[Join Vidyanidhi](#) [Resources & Facilities](#) [DSM](#)

Vidyanidhi (meaning 'Treasure of Knowledge' in Sanskrit) is India's premier Digital library initiative to facilitate the creation, archiving and accessing of doctoral theses. Vidyanidhi is an information infrastructure, a digital library, a portal of resources, tools and facilities for doctoral research in India. Vidyanidhi is envisioned to evolve as a national repository and a consortium for e-theses through participation and partnership with universities, academic institutions and other stakeholders. Vidyanidhi enhances access to Indian theses and enlarges the reach and audience for Indian doctoral research works.

Brief Description:

The Vidyanidhi is a national digital library for electronic theses and dissertations (ETD), initiated by the University of Mysore and supported by the Department of Scientific and Industrial Research (DSIR), Ford Foundation and Microsoft India. Vidyanidhi aims at enhancing visibility of Indian doctoral research through archiving and disseminating doctoral dissertations of researchers

submitted in Indian universities to a global audience. This is a national level repository, covering major Indian universities. Vidyanidhi established an official partnership with Jadavpur University, University of Hyderabad, University of Kashmir, Jamia Millia Islamia and National Social Science Documentation Centre (NASSDOC). Other universities of India also have taken part in this initiative. Vidyanidhi maintains mainly two kinds of databases, a bibliographic database and a full-text repository using DSpace software. Its bibliographic database has interfaces for simple search, advanced search, field-specific search, subject search, supervisor search, author search, and search in Indian Languages Kannada/Hindi. The search results display the following metadata: Title, Creator (Author), Subject, Contributor (Supervisor), Language, Degree Grantor and Year. Vidyanidhi also maintains an experts' database, where details of university faculties can be searched by the name of the guide or research area. Although, Vidyanidhi has digitization facilities and infrastructure, some of its partner universities don't have such digitization facilities. Thus, the collection of Vidyanidhi grows only when it shares its physical facilities with other universities, which is not practically feasible in a vast country like India. Till date, most of the universities in India do not insist that researchers submit electronic copies of doctoral theses, either on CD-ROM or online. If electronic copies of doctoral theses are available to partner universities, they could immediately be uploaded to the Vidyanidhi ETD database. The electronic theses repository can be browsed by name of the communities, name of collections, title of theses, name of researchers/authors, and by date. This repository can be searched by any metadata element or combination of elements (using Boolean operators), such as keywords, subject, title of theses, name of the researcher and name of the university. The information retrieved from the execution of a search query leads to retrieval of full-text contents of theses. Vidyanidhi is listed in and harvested by many online directories and metadata harvesters such as Google Scholar, OAIster, OpenDOAR, and CASSIR.

Type of Initiative: Digital Library

Principal Implementing Agency: Vigyan Prasar, Noida

Participating Institutions: National Council for Science & Technology Communication (NCSTC), New Delhi; NCSTC Network, Delhi; National Children's Science Congress

Supporting Agency: Department of Science & Technology, Government of India

Web Address 1: <http://www.vigyanprasar.gov.in/digilib/>

Web Address 2: <http://www.vigyanprasar.gov.in/dream/index.asp>

Brief Description:

Vigyan Prasar, established in 1989 as an autonomous society under the Department of Science and Technology (DST), undertakes large scale science popularization tasks in the country. Popular science books and periodical 'Dream 2047', published by Vigyan Prasar, are well accepted by the science communicators and popular science activists in India and other South Asian countries. Vigyan Prasar maintains a network of science clubs, popularly known as VIPNET, across the country for propagating scientific temperament among the youths and school children. Through its regular publications, activity kits and other information materials, Vigyan Prasar encourages children, youth and adult citizens to think scientifically and act scientifically, by reviving their inquisitiveness, curiosity and the habit of asking questions whenever they don't know or don't understand. Vigyan Prasar Science Portal, maintained by Vigyan Prasar Information System (VIPRIS), aims to provide updated information for anything and everything on science from India. Vigyan Prasar maintains an open access digital library to spread scientific knowledge, where the digital collection contains digitized full-text versions of all significant scientific works that are being published by Vigyan Prasar. So far, 72 books in English, 42 books in Hindi and 17 books in other languages are available in this digital library. The books in this digital library can be searched by keywords, title of the book, name of the author and language. *Dream 2047*, a popular science magazine and an open access periodical, is also archived in Vigyan Prasar Science Portal from volume one.

OPEN COURSEWARE INITIATIVES

CEC Learning Object Repository

This screenshot shows the search interface of the CEC Learning Object Repository. On the left, there is a small video thumbnail showing a person reading. The main area features a search bar with the text "Consortium for Educational Communication" and an "Enter" button. Below the search bar, the text "Learning Objects Repository" is displayed, followed by the tagline "Learning. Anytime. Anywhere." and a decorative floral logo.

This screenshot shows the search interface of the CEC Learning Object Repository with search criteria entered. The page has a blue header with the text "Learning Object Repository" and the Consortium for Educational Communication logo. The search criteria are as follows:

- Topic:
- Subject:
- Learning Object:
- Keywords:

Buttons for "Submit" and "Reset" are located below the search criteria. At the bottom of the page, the text "Visitor No:21404" is displayed.

Type of Initiative: Open Courseware/ Learning Object Repository

Principal Implementing Agency: Consortium for Educational Communication (CEC), New Delhi

Partner Institutions: University Grants Commission (UGC), Educational Multimedia Research Centres (EM²RC), Audio Visual Research Centre (AVRC), Vyas Channel on Gyan Darshan (24 hours Higher Educational Channel)

Supporting Agency: Ministry of Human Resource Development, Government of India

Web Address 1: www.cec-lor.edu.in

Web Address 2: www.cec-lor.edu.in/search.asp

Allied Projects:

- CEC Digital Video Repository www.cec-lor.edu.in/dvr/
- CEC E-Content Development - E-Learning Resources for Undergraduates www.cec-eccontent.edu.in/
- Web casting/ Multicasting of Vyas Channel <http://202.41.99.76/>

Brief Description:

Consortium for Educational Communication (CEC) is an inter-university centre on electronic media, established by the University Grants Commission (UGC). The CEC in coordination with its 17 Educational Multimedia Research Centres, has been producing television programmes in various subject categories in English, Hindi and regional languages. Some of

the audio-visual programmes are based on syllabus-based topics at the school, polytechnic, college and university levels. Produced educational programmes are broadcast on the national educational television channels such as Vyas Higher Education Channel, Gyan Darshan, and Doordarshan. All produced educational programmes are being regularly quality-checked before the telecast at CEC. To check the quality of the programmes produced by educational media centres and CEC, regular Preview Committee meetings are organized in various subject categories where experts are called to review programmes, which are then revised by the respective Centre before the telecast, based on comments from the Committee. The television programmes produced in CEC and broadcasted in educational channels are reusable. Thus, CEC established the Learning Object Repository (LOR) and the Digital Video Repository (DVR) to provide worldwide access to these qualitative learning resources. The LOR is a bank of short duration reusable learning objects for special benefits to students and teachers for face to face learning as well as to other users globally. The streaming video technique is used for online viewing of these learning objects. The LOR portal can be searched by subject, topic, title of the learning object, and keywords. This portal can also be navigated through subject categories.

eGyanKosh - A National Digital Repository

The screenshot shows the eGyanKosh website interface. At the top, there is a blue header with the logo of Indira Gandhi National Open University on the left and the text "A National Digital Repository" and "eGyanKosh" on the right. Below the header, the main content area is divided into several sections. On the left, there is a navigation menu with links for "Home", "About", "Contact", "Help", "Privacy Policy", "Terms of Use", "Site Map", "Feedback", and "Help". The central part of the page contains a search bar and a text block that reads: "National Digital Repository is a major initiative of the Indira Gandhi National Open University to provide just-in-time access to learning resources 24x7. The repository is meant to facilitate sharing of resources among educational institutions in the country. It has been developed with an objective of long-term preservation of learning materials available in various formats. The repository comprises:

- Self Instructional Material (SIM)
- Audio-visual programmes
- Articles of books and TV based live interactive sessions

 Communities in Repository: Choose a community to browse its collections. [2008 \(2008\)](#) [Get. About. eGyanKosh \(11/08\)](#)

On the right side, there is a "Sign In" section with a "Sign In" button, a "Sign Up" button, and a "Forgot your password?" link. Below this, there are links for "Related Websites" including "University Website", "eGyanKosh Website", and "CEEC Website". The footer of the page contains the text: "Copyright ©, 2008 Indira Gandhi National Open University, New Delhi - India".

Type of Initiative: Open Courseware

Principal Implementing Agency: Indira Gandhi National Open University (IGNOU), New Delhi

Partner Institutions: Distance Education Council; India EDUSAT

Supporting Agency: Ministry of Human Resource Development, Government of India

Web Address: www.egyankosh.ac.in

Software Used: DSpace

Allied Project: Sakshat, One Stop Portal on Indian Education www.sakshat.ac.in

Brief Description:

Indira Gandhi National Open University (IGNOU) is a mega open university that offers distance and open education to millions of learners in India and other countries. IGNOU produces self-instructional study materials for various programmes and also hosts a number of educational broadcasting channels. IGNOU has initiated the establishment of a National Digital Repository of learning resources *eGyankosh*. This repository envisages to store, index, preserve, distribute and share the digital learning resources of open and distance learning (ODL) institutions in the country:

The repository supports seamless aggregation and integration of learning resources in different formats such as self-instructional study materials, audio-video programmes, and archives of radio and television-based live interactive sessions. The repository facilitates any time access to its collections (24×7×365), offering interoperability and federated searching facility. The decentralized model of the repository supports multiple submission points facilitating submission of content from remote locations. The collection can be searched and browsed by subject, title, and author.

Presently, this repository has two communities, i.e. India and the Pan African e-Network. The *India* community has sub-communities, based on different academic divisions in IGNOU such as School of Agriculture, School of Computer and Information Sciences, School of Continuing Education, School of Education, School of Engineering and Technology, School of Health Sciences, School of Humanities, School of Law, School of Management Studies, School of Sciences, and School of Social Sciences. Under each sub-community, the user can get online access to full-text content of self-instructional study materials offered by this academic division. The community *Pan African e-Network* provides access to self-instructional study materials of the Master of Business Administration (MBA) programme.

Indo-German eGurukul on Digital Libraries

Principal Implementing Agency: Documentation Research and Training Centre (DRTC), Indian Statistical Institute, Bangalore

Supporting Agency: Goethe-Institut in New Delhi

Software Used: Moodle

Web Address: <http://drtc.isibang.ac.in/mmb/>

Allied Projects:

- Librarians' Digital Library <https://drtc.isibang.ac.in>
- Search Digital Libraries <http://drtc.isibang.ac.in/sdl>
- DLRG - Digital Library Research Group (a Discussion Forum) <http://drtc.isibang.ac.in/mailman/listinfo/dlrg>
- Sankhya, the Indian Journal of Statistics (an Open Access Journal) <http://sankhya.isical.ac.in>

Brief Description:

The Indo-German eGurukul on Digital Libraries is a collaborative project of DRTC and Goethe-Institut in New Delhi to facilitate self-paced learning on digital libraries. Presently this e-learning portal has the following modules:

- Introduction to Digital Libraries
- Digital Library Architecture and Digital Library Content
- Digitization Process
- Digital Preservation
- Metadata and Interoperability
- Digital Collection
- Digital Library Management and Access Rights
- Knowledge Organization and Retrieval
- Digital Library Services
- Evaluation and Digital Library Case Studies

The Indian digital library experts, in collaboration with their German counterparts, have developed the content of these modules. Users follow a free registration process for access to different learning modules and participation in the User Interaction Forum.

Joint Venture by seven Indian Institute of Technology (IITs) and Indian Institute of Science (IISc)

This is updated from the previous version. You are NO LONGER REQUIRED TO REGISTER LOGIN to access course contents.
Please proceed directly to course contents by clicking on Courses link above

Introduction

The main objective of NPTEL program is to enhance the quality of engineering education in the country by developing curriculum based video and web courses. This is being carried out by IITs (Seven), IISc Bangalore and other premier institutions as a collaborative project. At IIT Madras, the project is evolving and it is our intent to provide learning materials, digitally taped classroom lectures, supplementary materials and links to state-of-the-art research materials in every subject possible. Currently samples from approximately 70 courses offered by faculty in various departments and to students at all levels (B.Tech, M.Tech, M.S., M.Sc., Ph.D.) are given here. Approximately 140 courses are in various stages of preparation and distribution through internet.

All the faculty members are personally involved in the making of their respective courses in the electronic form. Our purpose is to supplement classroom lectures. The latter are compulsory for students and IIT Madras stipulates that students attend 75 percent of lectures to qualify for their examinations.

Type of Initiative: Open Courseware

Principal Implementing Institutions: Indian Institute of Technology Madras (Web Coordinator); Indian Institute of Technology Delhi (Video Coordinator)

Participating Institutions: Indian Institutes of Technology (seven IITs such as IIT Bombay, IIT Delhi, IIT Guwahati, IIT Kanpur, IIT Kharagpur, IIT Madras, and IIT Roorkee) and Indian Institute of Science (IISc), Bangalore

Supporting Agency: Ministry of Human Resource Development (MHRD), Government of India

Web Address: www.nptel.iitm.ac.in, <http://youtube.com/nptelhrd/>

Brief Description:

This is an open courseware initiative by seven Indian Institutes of Technology (IITs) and the Indian Institute of Science (IISc). The main objective of this programme is to enhance the quality of

engineering education in the country by developing more than 200 curricula-based video and web courses. Premier institutions of India are participating in this innovative programme for the production and dissemination of quality courseware in the areas of engineering and technology. Already a number of open courseware is now available through its website. A discussion forum for each web course is available. The open courseware and discussion threads can be accessed through the user-friendly portal interface. The video courses are at first broadcast through the Eklavya Technology Channel a technical education channel for television. This Initiative has constituted six Engineering Groups which are responsible for production of video courseware:

- Civil Engineering Group
- Computer Science and Engineering Group
- Core Science and Engineering Group
- Electrical Engineering Group
- Electronics and Communication Engineering Group
- Mechanical Engineering Group

The programme is systematically structured through the Technology Enhanced Learning (TEL) Committee, Programme Implementation Committee (PIC), National Programme Committee (NPC) and subject-level Expert Groups at the national level and institutional levels. This programme addresses harmonization of engineering curricula across the country as well as the shortage of quality teaching faculty at the second and third tier (i.e., government-supported and self-supported) institutions.

NCERT has initiated the first step towards digitalizing textbooks and making them available to students and teachers on the internet. We hope through this endeavour to open up a variety of pedagogical possibilities for students and teachers through out the country. We also hope that this effort will lead to a situation where teachers begin to adopt a more modular approach, rather than a sequential approach in teaching and learning through access to a variety of teaching and learning materials.

NCERT ONLINE TEXTBOOKS

In the next few months, we will be publishing all the textbooks from classes IX, X, XI & XII. Shortly, we will be publishing all the textbooks from classes IX to XII. We hope in the days to come to digitize and make all textbooks accessible on the internet.

Disclaimer: NCERT and NIPTE have taken utmost care to publish the textbooks as accurately as possible. However, in case of any correction or updation arising, it may be reported back for necessary modification.

Type of Initiative: Open Courseware

Principal Implementing Agency: National Council of Educational Research and Training (NCERT), New Delhi

Supporting Agency: Ministry of Human Resource Development, Government of India

Web Address 1: <http://www.ncert.nic.in/textbooks/testing/Index.htm>

Web Address 2: <http://www.ncert.nic.in/textbooks/backup/index.htm>

Allied Project: Sakshat, one stop portal on Indian Education <http://www.sakshat.ac.in>

Brief Description:

NCERT is an apex resource organization set up by the Government of India to assist and advise the Central and State Governments on academic matters related to school level education. NCERT publishes school textbooks, mainly in English, Hindi and Urdu. It has initiated a step towards making school textbooks freely available on the Internet for students and teachers through its website (www.ncert.nic.in). Most of the textbooks available in this portal are in new edition, based on the *National Curriculum Framework 2005*. The educational planners in NCERT expect that a variety of pedagogical possibilities would open up for students and teachers across the country through this initiative. It is also expected that this effort will lead to a situation where teachers begin to adopt a more modular approach, rather than a sequential approach to teaching and learning, through online access to a variety of teaching and reference materials. This portal provides easy navigation to textbook chapters by title/subject of the book for a particular class. The textbooks available here are written in English, Hindi and a few in Urdu.

UNESCO-SALIS e-Learning Portal for Awareness Raising on Information Literacy for Southern Asia

The Society for the Advancement of Library and Information Science (SALIS), India, in collaboration with UNESCO, has just launched a six-month project entitled Interactive E-Learning Portal on Information Literacy Competency Development Skills for South Asia. The project aims to raise awareness and enhance information literacy competency skills of laymen as well as information professionals and educators. Its objectives are fully in line with UNESCO's mandate to bridge the digital divide and UNESCO's vision of knowledge Societies.

This project has its genesis in recommendations of a UNESCO supported Workshop on Information Literacy Competency Development for Information Professionals and Special Educators organized in November 2006 by SALIS in Chennai, India, and subsequent Information Literacy sensitization workshops held in Delhi and Nagpur in December 2006.

The e-learning portal will cover a number of self-learning modules, such as:

- 1. Information Communication Technology (ICT)
- 2. Information Literacy
- 3. Information Literacy Models and Standards
- 4. Lifelong Learning and Development of Life Skills
- 5. Information Literacy Assessment
- 6. Information Services for the Disabled People
- 7. Freedom of Information/Right to Information
- 8. Sample Information Literacy Programmes for
 - School Library
 - College/University Library
 - Special Library
 - Public Library
 - Community Information Centres

Awareness Raising on Information Literacy

UNESCO-SALIS e-Learning Portal for Awareness Raising on Information Literacy
Website designed by Radius consultancy Promotion Pvt.Ltd

Principal Implementing Agency: Society for the Advancement of Library and Information Science (SALIS), India

Supporting Agency: UNESCO Office in New Delhi

Software Used: Moodle

Web Address: <http://salisonline.org/>

Allied Programme:

- IFLA/UNESCO Information Literacy Resources Directory www.infolitglobal.info
- Information for All Programme (IFAP) http://portal.unesco.org/ci/en/ev.php-URL_ID=21293&URL_DO=DO_TOPIC&URL_SECTION=201.html

Brief Description:

The UNESCO-SALIS e-Learning Portal is a collaborative project of the Society for the Advancement of Library and Information Science (SALIS) and UNESCO office in New Delhi. The project aims to raise awareness and enhance information literacy competency skills of laymen as well as information professionals and educators in the South Asian sub-region. Its objectives are fully in line with UNESCO's mandate to bridge the digital divide and UNESCO's vision of knowledge societies. Presently this e-learning portal has the following modules:

1. Information Communication Technology (ICT)
2. Information Literacy
3. Information Literacy Models and Standards
4. Lifelong Learning and Development of Life Skills
5. Information Literacy Assessment
6. Information Services for the Disabled People
7. Freedom of Information/Right to Information
8. Sample Information Literacy Programmes for
 - School Library
 - College/University Library
 - Special Library
 - Public Library
 - Community Information Centres

The information literacy competency skills imparted here, have been derived from the existing international standards, adopted by the UNESCO, the International Federation of Library Associations and Institutions (IFLA), American Library Association (ALA), and other professional societies. Indian library experts, in collaboration with lifelong learning experts, have developed the content of the modules in this eLearning portal. In order to access the different learning modules and participate in the Course Discussion Forum, a first-time user should opt for the user registration process. The learning system generates the unique login name and password which are required for subsequent access.

OPEN ACCESS JOURNALS

e-Journals @ INSA

The screenshot shows the website for e-journals@insa, part of the Indian National Science Academy (INSA). The header includes the INSA logo, the text 'भारतीय राष्ट्रीय विज्ञान अकादमी INDIAN NATIONAL SCIENCE ACADEMY', the website name 'e-journals@insa', and the DSIR NISSAT logo. A navigation menu on the left lists: Home, Pub. Home, About the Project, About the Academy, Our Publications, Recent Publications, Advanced Search, Help, Contact Us, and INSA News. A 'User Login' section contains input fields for username and password, with links for 'Forgot Password?' and 'Register'. A message states: 'To read our journals you need to have Adobe Reader installed.' Below this is the Adobe Reader logo. The main content area features a search bar and a 'Search Help' link. The 'About The Project' section describes the initiative to host scientific journals online. The 'About Indian National Science Academy' section details the academy's role in promoting science. The 'Our Publications' section displays covers for 'Indian Journal of Pure And Applied Mathematics' (Jan 2007, Aug 2007) and 'Indian Journal Of History of Science' (Dec 2005, Dec 2004). It also shows 'Proceedings of the Indian National Science Academy' for March, June, September, and December 2006. The footer contains copyright information: '© Indian National Science Academy 2003 All rights reserved | Disclaimer' and 'Project Supported by Department of Scientific and Industrial Research under it's NISSAT Program.'

Type of Initiative: Open Access Journals

Principal Implementing Agency: Indian National Science Academy (INSA), New Delhi

Supporting Agency: National Information System for Science and Technology (NISSAT), Department of Scientific and Industrial Research (DSIR), Government of India

Web Address: www.insa.ac.in

Allied Project: Digital Library of India www.new.dli.ernet.in/insa.htm

Brief Description:

The Indian National Science Academy (INSA) is a scientific academy funded by the Government of India. It was established in 1935. INSA publishes 4 peer-reviewed journals, organizes scientific discussions and brings out proceedings and monographs. The e-journals@insa is a project of the Indian National Science Academy that was started in July 2002. Initially this was a NISSAT-supported project entitled “Building Digital Resources: Creating Facilities at INSA for hosting S&T Journals on Online”, to facilitate conversion of INSA journals from print to digital format and host these materials online. The initial objectives of the above project were:

- To build up a national digital resource base with global visibility and accessibility.
- To bring out electronic versions of INSA journals and to make them available on a web server.
- This will lead to support and research activities by providing all time access to the full-text scientific information globally.

This portal provides access to current and back volume full-text literature of INSA journals. This project became one of the much-acclaimed open access initiatives in India, supporting the concept of free access to scientific literature. All INSA journals are open access and full-text is available as PDF files from the common journal gateway. The common journal gateway is freely accessible if users register their names in the website. This portal provides a search interface for advanced search, where search query can be given with any or more than one metadata elements, such as keyword, article title, name of the author, journal volume-issue-initial page number, and journal year. The combination of search elements is made possible by using Boolean operators. The recent journal issues as well as back volumes of INSA journals can be browsed from the main page of this portal. The search result displays a list of articles that match the search query; when a user selects a reference from the list it leads to the particular journal issue that published the particular reference, the PDF version of article appears on the screen and can be downloaded to the user workstation. Table 7 provides a list of INSA published open access journal titles.

Table 7: Indian National Science Academy Published Open Access Journals

Supporting Agency: Ministry of Science and Technology, Government of India

Web Address 1: www.ias.ac.in/pubs/journals/

Web Address 2: www.ias.ac.in/publications.html

Brief Description:

The Indian Academy of Sciences (IAS) is a scientific academy funded by the Government of India. It was established in 1934 and publishes 11 journals. All journals are open access and full-text literature is available as PDF files on each journal's website. All of the articles in current issues of these journals are born-digital. The articles of back volumes, which were not born-digital, have been digitized through a government-supported project. IAS has already archived all articles of journals from the first volume. From 2007 onwards, IAS journals are also available through SpringerLink, a subscription-based gateway of electronic journals. Table 8 provides a list of IAS published open access journal titles.

IndianJournals.Com Hosted Open Access Journals

The screenshot displays the homepage of IndianJournals.com, which is a platform for multi-disciplinary Indian journals and research publications. The page includes a navigation menu on the left, a search bar at the top, and a central section titled "Comprehensive Collection of Multi-Disciplinary Indian Journals and Research Publications". Below this, there are search options for "Browse" and "Keyword", and a "Search" button. A "Open Access Publications" link is also visible. The "Features" section lists several benefits: single window access to multi-disciplinary journals, full-text availability in XML and PDF formats, fully searchable multi-disciplinary and multi-journal search, multi-file journals (digital journals), table of contents alerts, personalized search alerts, password access, article pay-per-view, online fees, online subscription management facility, and a host of many more associated services. The page also features a "Log In" button and a "Forgot Password" link. At the bottom, there are logos for "International Journal" and "G" (Global). The page is designed with a blue and white color scheme and includes a sidebar with various links and a footer with contact information.

Type of Initiative: Open Access Journals

Principal Implementing Agency: Divan Enterprises, New Delhi

Partner Institutions: Academic and Professional Institutions/ Societies in India and other Asian countries

Web Address: www.indianjournals.com

Allied Projects: GPMed Gateway to Current Medical Information www.globepub.com/gpmed/

Brief Description:

IndianJournals.com provides single window access to multidisciplinary Indian journals published by different scholarly societies and institutions. It provides access to eleven open access journals and periodicals. This journal gateway also provides access to subscription-based content. These open access scholarly journals mainly belong to the science, technology and medicine (STM) areas. These journals are Open Archives Initiative (OAI)-compliant. This common journal gateway is freely accessible if the users register their names in the website. These journals are searchable from the main page of the gateway, which also maintains an archive of back volumes. Table 9 provides a list of IndianJournals.com hosted open access journal titles.

Table 9: IndianJournals.com Hosted Open Access Journals

Kamla-Raj Enterprises Published Open Access Journals

The screenshot shows the website for Kamla-Raj Enterprises. At the top, there is a logo with 'KRE' inside a circle. Below it, the text 'KAMLA - RAJ ENTERPRISES' is displayed in large, bold, yellow and red letters. The main content area is split into two columns. The left column, with a purple background, lists several journals: 'International Journal of Human Genetics', 'Journal of Human Ecology', 'Journal of Social Sciences', 'Studies on Ethno-Medicine', 'Studies on Race and Community Science', 'Studies of Tribes and Tribals', and 'The Anthropologist'. At the bottom of this list is a link for 'NEW JOURNALS'. The right column, with a green background, features a circular image of a landscape and a link that says 'Order NOW!'. Above the screenshot, the 'KRE' logo is repeated.

Principal Implementing Agency: Kamla-Raj Enterprises, Delhi

Partner Institutions: Academic Institutions and Scholarly Societies in India

Web Address: www.krepublishers.com/KRE-New-J/index.html

Brief Description:

The Kamla-Raj Enterprises is a Delhi-based publisher established in 1933. Kamla-Raj publishes seven print-based peer-review scholarly journals mainly in the areas of social sciences which are also available in electronic format on open access. These journals are OAI-compliant. The publisher maintains an archive of each of these open access journals starting from volume one. Table 10 provides a list of Kamla-Raj published open access journal titles.

MEDIND@NIC: Biomedical Journals from India

Indian Medians Centre

medIND

Biomedical Journals from India

One point resource of peer reviewed Indian biomedical literature covering full text of medIND journals. It has been designed to provide quick and easy access through searching or browsing.

Journals available on medIND:

- Annals of Cardiac Anesthesia
- Biotechnology
- Health Administration
- Indian Journal of Sarngadhara Medicine
- Indian Journal of Science, Culture and Environment
- Indian Journal of Anthropology
- Indian Journal of Cardiac Sciences and Allied Sciences
- Indian Journal of Clinical Biochemistry
- Indian Journal of Community Medicine
- Indian Journal of Geriatrics
- Indian Journal of Medical & Forensic Toxicology
- Indian Journal of Medical Microbiology
- Indian Journal of Medical Research
- Indian Journal of Neurology
- Indian Journal of Nuclear Medicine
- Indian Journal of Occupational and Environmental Medicine
- Indian Journal of Occupational Therapy
- Indian Journal of Otolaryngology and Head and Neck Surgery
- Indian Journal of Pediatrics
- Indian Journal of Pharmacology
- Indian Journal of Preventive and Social Medicine
- Indian Journal of Psychiatry and Imaging
- Indian Journal of Family Transmitted Diseases
- Indian Journal of Plastic and Reconstructive Surgery
- Indian Journal of Tuberculosis
- Indian Medicine
- J.L. Prasad
- Journal Indian Academy of Child Medicine
- Journal of Family Medicine
- Journal of Indian Academy of Forensic Medicine
- Journal of Indian Rheumatology Association
- Journal of Obstetrics and Gynaecology of India
- Journal of the Anatomical Society of India
- Journal of Indian Association of Pediatric Surgeons
- Journal of Indian Society of Reproductive and Preventive Dentistry
- Medical Journal Asian Tropical States
- N.S. Srinivas
- Trends in Biotechnology and Artificial Intelligence

Type of Initiative: Open Access Journals

Principal Implementing Agency: Indian MEDLARS Centre (IMC), Bibliographic Informatics Division, National Informatics Centre (NIC), New Delhi

Supporting Agency: Indian Council of Medical Research (ICMR), Ministry of Health and Family Welfare, Government of India

Web Address: <http://medind.nic.in>

Allied Projects:

- IndMED@NIC <http://indmed.nic.in>
- OpenMED@NIC <http://openmed.nic.in>
- Union Catalogue of Biomedical Periodicals <http://uncat.nic.in>

Brief Description:

The Indian MEDLARS Centre at the National Informatics Centre has initiated two unique projects with support from the Indian Council of Medical Research. The first one is INDMED@NIC that indexes 70+ prominent biomedical journals of India from 1985 onwards. This INDMED bibliographic database is available online. Another project, MEDIND@NIC is an open access initiative from NIC that provides open access to the full-text content of 38 Indian biomedical journals. MEDIND@NIC aims at providing online access to full-text Indian biomedical periodicals to the users within and outside India. Different publishers, mainly learned societies in the respective specialized areas, publish these journals in print-on-paper format. Initially, MEDIND@NIC started digitization of the contents of back volumes of the journals. But now they are getting born-digital content of current issues from the publishers. Some of these publishers also provide full-text access separately from their own websites. The metadata of these journal articles are also maintained and searchable in the INDMED database. Current issues of all journals are available from this single gateway. Table 11 provides a list of INDMED@NIC hosted open access journal titles.

Medknow Publications Hosted Open Access Journals

The screenshot displays the Medknow Publications website. At the top, the logo for Medknow Publications is visible. Below the logo, there is a navigation bar with links for 'About Us', 'Services', 'Journals', 'For Librarians', 'For Authors', and 'Advantage'. The main content area is titled 'Journals published by us' and includes several paragraphs of text describing the journals' policies, such as 'Open Access Policy', 'Author Friendly Journals', and 'High visibility, readership and impact'. To the right of the main content, there is a sidebar with a 'Write to us for subscriptions' section, a 'Search articles...' section with a search form, and a 'Search journals...' section with a search form. Below the main content, there is a list of journals with 'Show details' links for each.

Journals published by us

Medknow Publications publishes high quality peer-reviewed scholarly journals.

Open Access Policy: All of these journals provide immediate free access to the full text of articles. The journals also permit authors' self-archiving. None of the journals charge article submission, processing or publication fee from the authors or authors' institution. The open access policy of the journals aims at increasing the visibility and accessibility of the published content.

Author Friendly Journals: Most of the journals have easy-to-use electronic manuscript submission systems eliminating use of postal or hard-copy submissions. Online submission and processing of articles has resulted in considerable decrease in the submission-to-decision turnaround time.

High visibility, readership and impact: Our journals are the official publications of various societies/associations and are delivered to all the members of the respective associations. Online free access and being part of indexing in a large number of bibliographic databases adds to the high visibility and research impact.

Type of Initiative: Open Access Journals

Principal Implementing Agency: Medknow Publications Private Limited, Mumbai

Partner Institutions: Bio-medical Institutions and Scientific Societies in India and other Asian Countries

Web Address: www.medknow.com/journals.asp

Allied Projects: *Journal-on-Web*: Web-based Manuscript Submission and Peer Review
<http://www.journalonweb.com/>

Brief Description:

Medknow Publications Private Limited is a publisher of high-quality peer-reviewed scholarly open access journals in India. Medknow publishes, maintains and hosts 48+ peer-reviewed scholarly journals, mainly in the biomedical subject areas. Medknow also provides solutions to the scientific societies and scholarly institutions, through *Journal-on-Web* a web-based manuscript submission and peer review system that handles pre-publication and post-publication processes for journal issues. Medknow collaboratively publishes the electronic versions of some existing journals of learned societies and institutions in India. These journals

also accept online submission of manuscripts through dedicated websites for respective journals. These journals are OAI-compliant. Metadata harvesters, search engines and indexing services index and harvest metadata of the current issues of the journals from the individual journal websites. Table 12 provides a list of Medknow hosted open access journal titles.

CASSIR

Welcome to cross-repository indexing and search service...

This service is a part of the ongoing project "Development of OAI-Based Institutional Research Repositories Services in India", sponsored by Department of Scientific & Industrial Research, Ministry of Science & Technology, Government of India. This project is being carried out at National Centre for Science Information (NCSI), Indian Institute of Science (IISc), Bangalore. The service will harvest metadata as per the OAI-PMH protocol from the registered OAI repositories in India. It also provides a web-based search/browse functionality over the harvested metadata.

Powered by Digi's Knowledge Project Repository

Repository Stats ?
CASSIR currently has **16409** records from **10** Indian repositories indexed.

- KM-Forum - Global Discussion Forum for Knowledge Management <http://ncsi.iisc.ernet.in/mailman/listinfo/km-forum>

Brief Description:

The CASSIR is a metadata harvesting service for Indian repositories, a project initiated by the National Centre for Science Information (NCSI) of the Indian Institute of Science (IISc) and supported by DSIR. This web-based search and browse service is a part of the ongoing project entitled 'Development of OAI-Based Institutional Research Repository Services in India'. In this service, *Open Archives Initiative-Protocol for Metadata Harvesting* (OAI-PMH) compliant software (PKP Harvester) harvests metadata from the registered open access repositories in India. At present, CASSIR covers eighteen Indian open access repositories:

- Catalysis Database (ePrints@NCCR IIT Madras)
- DRS at National Institute of Oceanography
- DSpace at ICFAI BUSINESS SCHOOL (IBS), Ahmedabad
- DSpace at IIMK
- DSpace at National Chemical Laboratory, Pune, India
- DSpace at Vidyanidhi
- DSpace@DRTC
- Dspace@NITR
- DU Eprint Archive

- ePrints@IISc
- ePrints@IIT Delhi
- ETD @ Indian Institute of Science
- Indian Institute of Astrophysics
- DSpace at ISI Library, Bangalore
- NAL Institutional Repository
- OneWorld South Asia Open Archive Initiative
- OpenMED@NIC
- RRI Digital Repository

These open access repositories store a number of scholarly publications in digital format. Thus, CASSIR serves a functionality of cross-searching of repositories. This cross-searching functionality is much needed in a country like India where hundreds of open access repositories are expected to be proliferated in near future, if the *UGC (Submission of Metadata and Full-text of Doctoral Theses in Electronic Format) Regulations* implemented soon. Figure 11 shows the search interface of CASSIR, where searching of scholarly publications in Indian repositories can be carried out easily, by limiting document type such as 'thesis'.

Open Index Initiative

The screenshot shows the Open Index Initiative website. On the left is a navigation menu with sections: Introduction (Home, List of Journals Indexed, Journals yet to be Indexed, Site Data Contributions, Index for Journals Indexed), For Registered Members (Data Contributions, Please Click Here), OAI Services (Institutions and Professionals Center, Books Reviews, Conferences/Seminars/Workshops, Index to EPRN, 1990-2009, Index to Digital Content (AI), SCOPUS/DFAC, Open-Source Software and Experts, Online Directory of Institutes, Online Directory of Journals, Theses and Dissertations, Thesaurus | Guide Construction, Open Catalogue of Journals, Working Papers Center), Links (ERIC, ECRIN, Indian Directory, NAL, Research in Context, SCOPUS, SRII Center), and Updated on 08 09 2007. The main content area has the Open Index Initiative logo, a quote by Henry Ford: "Coming Together is a Beginning, Keeping Together is Progress, Working Together is Success", and two buttons: "For Journal Members" (Data Contributions, Please Login) and "For Registered" (Please Click). At the bottom, there is a disclaimer: "Disclaimer: This is a non-commercial portal. Also provides external links to the websites/webpages pertaining to Social Science and related resources available over the Net. The content of these websites are owned by the respective site owners and they may be contacted for any further information or suggestion. Broken links if any may be reported to SRIICDR" and the SRIICDR logo.

Type of Initiative: Metadata Harvesting Service

Principal Implementing Agency: Indira Gandhi Institute of Development Research (IGIDR) Library, Mumbai

Supporting Agency: Indira Gandhi Institute of Development Research (IGIDR), Reserve Bank of India, Government of India

Web Address: <http://oii.igidr.ac.in>

Allied Project: IGIDR Working Papers Online <http://www.igidr.ac.in/lib/papers.php>

Brief Description:

The Open Index Initiative (OII) is a collaborative effort of 16+ volunteers working in Indian social science libraries across 5+ Indian cities, with a basic objective to develop an exhaustive online database with index and abstract to journal articles, book reviews, conference papers, and working papers published in Indian social science journals or published by Indian social science institutions.

The Open Index Initiative (OII) portal facilitates information on:

- Forthcoming Conferences/Seminars/Workshops in India in Social Sciences and related areas
- Indian Social Science Associations and Professional Bodies
- Search for Book Reviews
- Index to Articles of *Economic and Political Weekly* (EPW, 19922005)
- Index to Journal Articles
- Open Source Software and Experts
- Online Directory of Social Science Institutions
- Theses and Dissertations
- Union Catalogue of Journals
- Working Papers Online
- IGIDR OPAC (Online Public Access Catalogue)

The volunteers in this initiative contribute their data on the scholarly resources available with them. The web-based data entry module facilitates recording of data, related to:

- Experts in Open Source Software
- Index to Journal Contents
- Update the Online Directory of Libraries
- Statistical and Government Publications
- Theses and Dissertations
- Union Catalogue of Journals
- Working Papers

OII is a public-access database that promotes scholarly literature in social sciences, produced by Indian social science researchers/institutions or published in Indian social science journals. It

follows the human-driven metadata submission model, in contrast to the software-driven metadata extraction model. Thus, the OII system gets a wide variety of data sets, which is unparalleled to the metadata harvesting services established elsewhere.

Figure 12: OII Search Interface for Working Papers

Open J-Gate

Type of Initiative: Open Access Journal Gateway

Principal Implementing Agency: Informatics India Limited, Bangalore

Partner Institutions: Publishers of Open Access Journals

Web Address: www.openj-gate.com

Allied Projects:

- J-Gate <http://j-gate.informindia.co.in/>
- J-Gate Custom Content (JCC)
- J-Gate Custom Content for Consortia (JCCC) <http://www.jccc-indest.informindia.co.in/>,
<http://www.jccc-icmr.informindia.co.in>

Brief Description:

On February 27, 2006, Informatics India Limited launched *Open J-Gate*, a searchable portal of open-access journals that provides access to 4,300+ open access journals and million plus records of articles. Open J-Gate is the first corporate initiative in India to promote and support open access initiatives. The bibliographic database is maintained in a well-index database, having the metadata such as, the title of the article, name of authors, author email-id, author's affiliation, source, keywords, abstract and full-text links to each article. It has Quick Search, Advanced Search, and Browse by journal options. In Advanced Search option, search can be limited to a few subject categories or sub-categories, journal type, a few metadata (such as title, keyword, abstract, author, institution/address, or, all). When search results are displayed, each retrieved record provides details of the article and links to full-text article at publisher sites. In this service, full-text links are regularly validated.

Open J-Gate follows three-level hierarchical system, where first consists of seven main subject categories, such as:

- Agricultural and Biological Sciences
- Arts and Humanities
- Basic Sciences
- Biomedical Sciences
- Engineering and Technology
- Library and Information Sciences
- Social and Management Sciences

Open J-Gate covers open access peer-reviewed journals as well as professional and industry journals. Although this service has worldwide coverage, mainly open access journals published in English language are indexed in this online database.

Figure 14: Open J-Gate Advance Search Results

Scientific Journal Publishing in India: Indexing and Online Management (SJPI)

The screenshot displays the website for the Scientific Journal Publishing in India (SJPI) project. At the top, the project title is prominently displayed in red. Below it, the logo and name of the project are shown. The main navigation menu on the left includes links for 'Home', 'About Project', 'Sponsors', 'Journal OJS Workshop', 'Project Team', 'Editorial Board', 'Prototype', 'Index SA Journals', 'Presentations', and 'Contact'. The central content area is titled 'Major Outcomes of Project SJPI' and 'Online Edition of Journal of Tropical Agriculture Open Journal Systems in Hindi'. It describes the project's goal to improve scientific research publication accessibility by creating an online system. Key features listed include:

- Open Access:** Journals are freely available to all users.
- Multi-language:** Supports multiple languages, including Hindi.
- Full-text search:** Allows users to search for articles across the entire journal archive.
- Advanced search:** Provides options to filter results by author, title, and keywords.
- Cross-Journal Search Service:** A facility to search across multiple journals simultaneously.

 The bottom section of the page shows a 'Cross Journal Search Service' interface with various search filters and a 'Search Now' button.

Brief Description:

The Scientific Journal Publishing in India (SJPI) is a project funded by international development agencies, having as project goal to improve the accessibility of scientific literature published in Indian journals by introducing an indexing system. This is a kind of demonstration of a system that would be self-sustaining under the existing infrastructure to support Indian scientific journals and academic publishing. The project popularizes to editors and administrators of Indian scientific journals and academic publishing, a free and open source software (FOSS), named Open Journals Systems (OJS) developed by UBC Public Knowledge Project. OJS assists with every stage of the refereed publishing process, from submissions to online publication and indexing. Additionally, OJS helps OAI-PMH compliant metadata harvesters to index/harvest the contents of open access journal issues. The SJPI is implemented in two phases, where each phase has some specific objectives, which are given in Table 13.

Table 13: Specific Objectives of SJPI Project

Specific Objectives of Phase 1

- The indexing module would be demonstrated with the Indian Academy of Sciences journals (<http://www.ias.ac.in/>).
- The complete management system would be implemented with the Journal of Indian Institute of Science (<http://journal.library.iisc.ernet.in/>).
- The technical team of the Public Knowledge Project would consult the researchers at NCSI to ensure the design improvements contribute to OJS and related systems.
- The metadata generated by the demonstration journals would be harvested at the National Centre for Science Information using the Public Knowledge Project's open source PKP Harvester. This would establish an indexing portal for Indian online scholarly publications that would complement NCSI's well-established 'SciGate: The IISc Science Information Portal' and the 'IISc EPrints Archive'.
- The metadata collected by NCSI's PKP Harvester would be harvested, in turn, by the global engines, such as OAIster, creating a global presence for Indian research journals.
- This will also enable exploration of establishing linkages with other international efforts like the Directory of Open Access Journals (DOAJ) of the Open Society Institute and contribution to global efforts in open access to research literature.

Specific Objectives of Phase 2

- To help Indian Journals to go online with the Journal Management Software
- To support Hindi language to the OJS system
- To add new features to the OJS system, e.g. Latex support, Classification Scheme
- To conduct another workshop on Open Access Journal Publishing

In the first phase, a Prototype Journal System was set up using OJS software, where **the** following journals participated:

- Bulletin of Materials Science
- Current Science
- Journal of Astrophysics and Astronomy
- Journal of Biosciences
- Journal of Chemical Sciences
- Journal of Genetics
- Journal of Indian Institute of Science
- Pramana: Journal of Physics
- Proceedings - Earth and Planetary Sciences
- Proceedings - Mathematical Sciences
- Resonance - Journal of Science Education

- Sadhana (proceedings in engineering sciences)
- SRELS Journal of Information Management (SJIM)

The SJPI Cross Journals Search Service is part of the SJPI project. In this service, an OAI-PMH compliant software (PKP Harvester) harvests metadata from the sample full-text contents of participating Indian scholarly journals. This demonstrates a single point search service across multiple scholarly journals. The SJPI Cross Journals Search Service covers Indian journals listed above. Although this SJPI Cross Journals Search Service is a prototype system and not updated regularly, this is still available online.

Search Digital Libraries (SDL)

The screenshot shows the SDL website interface. At the top, the title "SDL Search Digital Libraries" is displayed in a large, stylized font, with the subtitle "In Library and Information Science" below it. A navigation menu includes links for HOME, ABOUT, SEARCH, BROWSE, and HELP. The main content area features a breadcrumb trail "Home > SDL" and a heading "SDL". Below this, a welcome message reads: "Welcome to DRIC's Search Digital Libraries (SDL)". The text explains that SDL harvests metadata from open access digital libraries and e-journals in the area of Library and Information Science. It provides instructions on how to browse repositories and view search results. A "NOTE" section advises users on how to get their digital library harvested by SDL. On the right side, there is a "HARVESTER STATS" section showing that Harvester2 currently has 19940 papers from 9 archive(s) indexed. Below this is a "CONTENT" section with a search input field and a "Search" button. At the bottom right, there is a "FONT SIZE" section with three buttons for font size adjustment. The footer contains the copyright information: "© 2005-2007 Alan Smecher and John Williams".

Type of Initiative: Metadata Harvesting Service

Principal Implementing Agency: Documentation Research and Training Centre (DRTC), Indian Statistical Institute, Bangalore

Supporting Agency: Indian Statistical Institute, Government of India

Software Used: Public Knowledge Project (PKP) Harvester

Web Address: <http://drtc.isibang.ac.in/sdl/>

Allied Projects:

- Librarians' Digital Library <https://drtc.isibang.ac.in/>
- Indo-German eGurukul on Digital Libraries <http://drtc.isibang.ac.in/mmb/>
- DLRG - Digital Library Research Group (a Discussion Forum) <http://drtc.isibang.ac.in/mailman/listinfo/dlrg>
- Sankhya, the Indian Journal of Statistics (an Open Access Journal) <http://sankhya.isical.ac.in/>

Brief Description:

The Search Digital Libraries (SDL) is a metadata harvesting service for open access repositories in the area of library and information science, a project initiated by the Documentation Research and Training Centre (DRTC) of the Indian Statistical Institute (ISI Bangalore). In this service, an OAI-PMH compliant software (PKP Harvester) harvests metadata from the registered open access repositories in the subject area of library and information science. At present, SDL covers nine open access repositories, including one from India:

- Australian Library and Information Association e-prints
- CALTECHLIB
- CCSD: Sciences de l'Information et de la Communication, France
- DLIST, University of Arizona
- E-LIS: E-Prints in Library and Information Science
- Journal of Technology Management & Innovation
- Librarians' Digital Library (LDL)
- OCLC Research Publications
- University of North Carolina, USA

These open access repositories store a number of scholarly publications in digital format. Thus, SDL serves a functionality of cross-searching subject-specific repositories. Figure 16 shows the Browse interface of SDL, where browsing of scholarly publications in a selected repository can be carried out easily, followed by retrieval of relevant document.

NATIONAL LEVEL OPEN ACCESS REPOSITORIES

Catalysis Database

The screenshot shows the homepage of the Catalysis Database. At the top, there is a navigation bar with links for Home, About, Browse by Year, and Browse by Subject. Below this is a search bar with a 'Login' link and a 'Create Account' link. The main content area features a welcome message: 'Welcome to NCCR eprints database'. A paragraph describes the National Centre for Catalysis Research (NCCR), stating it started functioning in July 2006 and focuses on research in catalysis, such as new energy sources, nano-materials, green processes, photo-catalysis, electro-catalysis, and bio-catalysis. To the right of this text are three small icons labeled 'Atom', 'RDS 1.0', and 'RDS 2.0'. Below the text are four main sections, each with a blue header and a light blue background: 'Latest Additions' (with a sub-link 'View items added to the repository in the past week'), 'Search Repository' (with a sub-link 'Search the repository using a full range of fields'), 'Browse Repository' (with a sub-link 'Browse the items in the repository by subject'), and 'About this Repository' (with a sub-link 'More information about this site'). At the bottom of the page, a footer line states 'Catalysis Database supports [ON 2.0](#) with a base URL of <http://203.199.233.40/eprints/oa2>'. The footer also includes a copyright notice: 'Catalysis Database is powered by [EPrints](#), which is developed by the [School of Electronic and Computer Science](#) at the University of Southampton. [More information and software details](#)'. The 'eprints' logo is visible in the bottom right corner.

Type of Initiative: Institutional Repository

Principal Implementing Agency: National Centre for Catalysis Research (NCCR), Indian Institute of Technology Madras (IITM), Chennai

Participating Institution: Catalysis Society of India

Supporting Agency (Indian): Indian Institute of Technology Madras (IITM), Ministry of Human Resource Development, Government of India

Software Used: EPrints

Web Address: www.eprints.iitm.ac.in

Brief Description:

The National Centre for Catalysis Research (NCCR) is a premier research institution devoted to interdisciplinary research in catalysis, chemical sciences and allied areas. The Catalysis Database collects, preserves and disseminates the scholarly materials in digital format produced by members of the Catalysis Society of India (CSI) and/or the scientists of the National Centre for Catalysis

Research (NCCR). This database contains research publications, conference papers, conference proceedings, theses and dissertations related to a narrower area of chemical sciences that covers the various areas of catalysis, namely, new energy sources, nano-materials, catalysts, green processes, photo-catalysis, electro-catalysis, and bio-catalysis. This portal provides RSS and Atom feeds for keeping readers up to date with new additions. This repository is compliant to OAI-PMH (Protocol for Metadata Harvesting) and indexed in the CASSIR (Cross Archive Search Service for Indian Repositories), OAIster and OpenDOAR (Directory of Open Access Repositories).

Principal Implementing Institutions: eSocialSciences, Mumbai (Content Management);
Strategic Planning, Monitoring and Evaluation Unit, UNICEF, New Delhi

Participating Institutions: Ministry of Women and Child Development, Government of India;
Child Rights and You (CRY); Center for Enquiry into Health and Allied Themes (CEHAT) and
the International Labour Organisation (ILO)

Supporting Agency: United Nations Children's Fund (UNICEF), India

Web Address: <http://www.kcci.org.in/>

Allied Project: eSocialSciences <http://www.esocialsciences.com/>

Brief Description:

The *Knowledge Community on Children in India* (KCCI) is a digital archiving initiative supported by UNICEF India for widening the knowledge base in the sectoral areas. The KCCI project aims at promoting information-sharing on policies and programmes related to children in India. The KCCI portal aims to be a dynamic, up to date repository of evidence-based research in the form of case studies, research papers, articles on policies and programmes related to the development of women and children. This portal is also filling the knowledge gaps in the implementation of successful intervention programmes for children. The case studies of successful projects answer the basic questions of “what works?” and “what could be improved?”. The KCCI initiative helps in gathering lessons from the field in order to improve programming and eventually influence policies related to children. The eSocialSciences (eSS), a broad-based, multidisciplinary social sciences and humanities portal, is the content development partner that coordinates archiving of relevant documents from UNICEF partner organizations. This open access document repository makes available case studies, evaluations, policy briefs, essays, scientific papers, interns' case studies, teaching and training materials, surveys, presentations and reports. This portal has different subject categories linked to children such as health, nutrition, HIV/AIDS, education, child protection, child labour, water and sanitation and maternal health. It is also endowed with simple as well as advanced search facilities to retrieve the documents archived therein.

Librarians' Digital Library (LDL)

LDL Librarians' Digital Library

Home | About Us | Services | Help | Search | Communities in DSpace

baseURL for harvesters: <http://drtc.isibang.ac.in/cgi/req.cgi>

Type of Initiative: Open Access Archive

Principal Implementing Agency: Documentation Research and Training Centre (DRTC), Indian Statistical Institute, Bangalore

Supporting Agency: Indian Statistical Institute, Government of India

Software Used: DSpace

Web Address: <https://drtc.isibang.ac.in/>

Allied Projects:

- Search Digital Libraries <http://drtc.isibang.ac.in/sdl>
- Indo-German eGurukul on Digital Libraries <http://drtc.isibang.ac.in/mmb/>
- DLRG - Digital Library Research Group (a Discussion Forum) <http://drtc.isibang.ac.in/mailman/listinfo/dlrg>
- Sankhya, the Indian Journal of Statistics (an Open Access Journal) <http://sankhya.isical.ac.in/>

Brief Description:

The Documentation Research and Training Centre (DRTC) is a premier library school in India. DRTC conducts workshops and seminars annually on the latest topics applicable to the library and information services. The Librarians' Digital Library (LDL) is a national-level open access archive in the area of library and information science. Initially the collection was developed through a digitization project, where proceedings and training modules of DRTC seminars/workshops were digitized. Later, a self-archiving process was made open to the library professionals registered with this portal. This open access repository stores different kinds of scholarly materials such as journal articles, conference papers, theses, dissertations, reports, presentations, multimedia objects and digital photos pertaining to the specific subject. Although major documents are written in the English language, a few sample documents can be found in Hindi or Kannada. A certain level of encryption and security is embedded in the site which may cause some users accessibility problems. LDL also provides an indicative list of open access repositories in India using DSpace open source software. LDL has the potential to become an internationally-acclaimed open access repository similar to E-LIS (E-Prints in Library and Information Science) and dLIST (Digital Library of Library and Information Technology). This repository is compliant to OAI-PMH (Protocol for Metadata Harvesting) and indexed in the OpenDOAR (Directory of Open Access Repositories), Google Scholar and OAIster.

The screenshot shows the LDL Librarians' Digital Library interface. At the top right, the logo 'LDL Librarians' Digital Library' is displayed. Below it, a search bar is visible with the text 'Search DSpace' and 'DSpace at My University >'. The main content area is titled 'Items for Author "Das, Anup Kumar"'. It includes a navigation menu on the left with options like 'Home', 'Browse', 'Communities & Collections', 'Titles', 'Authors', 'Subjects', 'By Date', 'Sign on to:', 'Receive email updates', 'My DSpace', 'Edit Profile', 'Help', and 'About DSpace'. The main content area shows a table of items for the author 'Das, Anup Kumar', sorted by title. The table has three columns: 'Issue Date', 'Title', and 'Author(s)'. The items listed are:

Issue Date	Title	Author(s)
Jul-2005	Bibliographic utility networks	Das, Anup Kumar; Dutta, Bidyarthi
Apr-2005	Collection development in digital information repositories in India	Das, Anup Kumar; Sen, B.K.; Dutta, Chaitali
Nov-2005	Digitization of scholarly materials in India for distance and open learners	Das, Anup Kumar; Sen, B.K.; Dutta, Chaitali
15-Jun-2007	ETD Policies, Strategies and Initiatives in India: A Critical Appraisal	Das, Anup Kumar; Sen, B.K.; Dutta, Chaitali
Mar-2001	Higher education in library & information science in India	Dutta, Bidyarthi; Das, Anup Kumar
Mar-2001	Indian Journal of Medical Research – an analysis of citation pattern	Das, Anup Kumar; Sen, B.K.
Jan-2006	Information literacy and public libraries in India	Das, Anup Kumar; Lal, Banwari
Jun-2006	Information literacy initiatives in India with special reference to emerging knowledge economy	Ghosh, S.B.; Das, Anup Kumar
Mar-2002	INSDOC'S contribution to bibliometrics	Sen, B.K.; Dutta, Bidyarthi; Das, Anup Kumar

OpenMED@NIC

[Home](#) [About](#) [Contact Us](#) [Search](#) [Register](#) [Login/Logout](#) [Help](#)

OpenMED@NIC is an **open access** archive for medical and Allied Sciences. Here authors of research articles published in journals can upload their articles online. For the first time this **register** once in order to obtain a user ID in OpenMED system. However no registration is required for searching the archive or viewing the contents.

OpenMED is a discipline based Internet based Archive. It accepts [English policy - dated 10th March 2006] peer reviewed, journal publishing, reference, or reviews in Medical and Allied Sciences including Bio-Medical, Medical Informatics, Dental, Nursing and Pharmaceutical Sciences. These could be peer reviewed journals, peer reviewed reference journals, papers and reference items, in case of non-English documents, descriptive data (Author, Title, Source etc.), abstract and keywords must be in English. Submitted documents will be placed into the submission buffer and would become part of the web archive on their acceptance.

The archive operated by the user in their own name and is not an official archive and should be working in the area of Medical and Allied Sciences. We expect it to promote publishing and access to users. Probably, individuals in their field. Authors who wish to post papers to the Archive should first consult the **Document Submission and Acceptance Policy** located in OpenMED and be guided by the guidelines regarding the content and quality of the information submitted. They must read **Disclaimer** before using this site.

Bibliographic Informatics Division
National Informatics Centre
A-Block, CGO Complex, Lodhi Road
New Delhi 110004, India.
openmed.nic.in

Type of Initiative: Open Access Archive

Principal Implementing Agency: Bibliographic Informatics Division, National Informatics Centre (NIC), New Delhi

Supporting Agency: National Informatics Centre, Ministry of Communication and Information Technology, Government of India

Software Used: EPrints

Web Address: <http://openmed.nic.in/>

Allied Projects: IndMED@NIC <http://indmed.nic.in> , MEDind@NIC <http://medind.nic.in/>, Union Catalogue of Biomedical Periodicals <http://uncat.nic.in/>

Brief Description:

The OpenMED is a national level open access archive for biomedical and allied sciences providing a self-archiving facility to biomedical researchers, practitioners and professionals. The objective of this initiative is to encourage a self-archiving culture amongst biomedical researchers, practitioners and professionals in India so that cases in evidence-based clinical practices and biomedical research reports can be widely disseminated. The goal of this repository is to preserve valuable research publications for future biomedical researchers and publicize research being conducted in the country. Although this repository has wide coverage in all major biomedical subject areas, it has a comprehensive collection of papers on tuberculosis as well as tropical diseases.

Using this facility, authors/researchers/practitioners can self-archive their scientific and technical documents. They would need to register once in order to obtain a unique user identity in the system. No registration is however required for searching the archive or viewing the documents. OpenMED accepts both published and unpublished documents having relevance to research in biomedical and allied sciences including paramedical areas. Self-archived contributions can be in the form of journal articles, conference papers, conference proceedings, posters, presentations, clinical cases, technical reports, working papers, policy documents, theses and dissertations. This repository also accepts documents in Indian languages, but in this case descriptive metadata is entered in English. The self-archived document then goes to the moderator and becomes part of the OpenMED archive on its acceptance. Presently, this archive also serves as a knowledge repository of journals, institutions and conference organizers in India for long-term preservation of research publications. These include:

- Institutional Repositories
 - College of Veterinary Science and Animal Husbandry, Anand Agricultural University
 - National Tuberculosis Institute
 - Sir Ganga Ram Hospital, New Delhi
- Journal Repositories
 - Anatolian Journal of Psychiatry
 - Archives of Medical Science
 - Calicut Medical Journal
 - Indian Journal of Medical Informatics
 - Indian Journal of Tuberculosis
 - Indian Pacing and Electrophysiology Journal
 - Indian Veterinary Journal
 - JK Science
 - Journal of Applied Basic Medical Sciences
 - Journal of Indian Association for Child and Adolescent Mental Health
 - Online Journal of Health and Allied Sciences

This repository is compliant to OAI-PMH (Protocol for Metadata Harvesting) and indexed in the CASSIR (Cross Archive Search Service for Indian Repositories), Google Scholar, OAIster and OpenDOAR (Directory of Open Access Repositories).

Type of Initiative: National Open Access Repository

Principal Implementing Agency: Higher Education Commission, Government of Pakistan

Supporting Agency: Higher Education Commission, Government of Pakistan

Participating Institutions: Public Sector Universities, Private Sector Universities, and Degree Awarding Research Institutes

Software Used: EPrints

Web Address: www.eprints.hec.gov.pk

Related Project: HEC-National Digital Library <http://www.digitallibrary.edu.pk>

Brief Description:

The Higher Education Commission (HEC) is an apex body for higher education system in Pakistan that makes transformation of indigenous university system in Pakistan into a world class centre of education, research and development. The Pakistan Research Repository (PRR) is an open access digital archiving project of the Higher Education Commission to increase international visibility of results of research emanating from institutions of higher education in Pakistan. The aims of this service are to maintain a digital repository of the intellectual outputs of Pakistani institutions, to provide a single-entry access point to view this research, and to disseminate the scholarly literature as widely as possible. It provides Atom and RSS feeds for information registered users on latest additions. PRR can be browsed by type of documents. Presently it has archived journal articles, conference papers and PhD/MPhil theses and dissertations. Some other types of scholarly documents such as patents, monographs, books and learning resources will be added in near future. PRR has adopted a systematic mechanism for collection and digitization of MPhil and PhD level theses submitted in Pakistani universities. The present collection of electronic theses has following subject coverage:

- Agriculture and Veterinary Sciences
- Arts and Humanities
- Biological and Medical Sciences
- Business Administration and Management
- Engineering and Technology
- Physical Sciences
- Social Sciences

This repository is compliant to OAI-PMH (Protocol for Metadata Harvesting) and indexed in the OpenDOAR (Directory of Open Access Repositories), Google Scholar and OAIster.

Software Used: WebBiblio Subject Gateway System (WebBiblio 3.0)

Web Address 1: <http://uhrc.in/uhgateway/>

Web Address 2: <http://uhrc.in/uhgateway/home/index.php>

Related Project: WebBiblio Subject Gateway System <http://webbiblio.sourceforge.net/>

Brief Description:

Urban Health Gateway is an extensive collection of open access literature on health of the urban poor and other related subjects with focus on India. This is an initiative of Urban Health Resource Centre in New Delhi. This gateway is basically a compilation of articles, reports, and case studies on the specific subject areas. It is envisaged as a ready reference and easily accessible resource on urban health for researchers and other stakeholders with an interest in urban health. This initiative strives to improve access to the public healthcare system in urban, semi-urban and industrial areas, where access to relevant information at the right time is very crucial. This gateway helps to find urban health-related information and leads researchers to the point where the resources are available. This portal provides RSS Feeds for informing latest additions to the registered users. This gateway covers the following areas in biomedical sciences:

- Child and Adolescent Health
- Child Nutrition and Growth
- Childhood Mortality and Morbidity
- Health Behaviour
- Health Care Delivery System
- Hygiene and Diarrhoea
- Infant Feeding Practices
- Public Private Partnership
- Urban Health Project Reports
- Urban Health Policies and Programmes
- Urban Poverty and Vulnerability
- Urbanization and Health
- Water and Sanitation

This Gateway runs on WebBiblio, an open source subject gateway system, developed by an Indian called Jack Eapen. It provides user-friendly searching and browsing facilities. Most popular titles and latest additions are also found in this portal.

INSTITUTIONAL REPOSITORIES

Digital Archive of National Institute of Technology - Rourkela

The screenshot shows the DSpace@NITR website interface. At the top left, there is a search bar labeled "Search DSpace" with a "Advanced Search" link below it. The main content area features a "Welcome to the Digital Archive of NITR Research Outputs!" message, followed by a description of the archive's purpose: "DSpace@NITR collects, preserves, and disseminates the intellectual output of NITR to the global audience. Presently it archives journal articles, preprints and conference papers authored by NITR researchers." Below this, it states "Documents in this archive are now indexed by OAIster where you can access a broad national and open access network of journals, the contents of other selected institutions across the globe." A "Total Number of Documents in DSpace@NITR" link is provided. A Google search box is visible with the URL "www.dspace@nitrrkl.ac.in" entered. The "Communities in DSpace" section includes a link to "National Institute of Technology - Rourkela". The sidebar on the right contains links for "About NITR", "Contact", "Help", "Submission", "Browse", "Copy Right", "DSpace", and "DSpace".

Type of Initiative: Institutional Repository

Principal Implementing Agency: National Institute of Technology- Rourkela (NITR)

Supporting Agency: National Institute of Technology- Rourkela, Ministry of Human Resource Development, Government of India

Software Used: DSpace

Web Address: <http://dspace.nitrkl.ac.in/dspace/>

Brief Description:

The National Institute of Technology Rourkela, one of the National Institutes of Technology spread all over the country, is engaged in higher education and research activities in the areas of engineering, technologies and applied sciences. The NITR institutional repository collects, preserves and disseminates intellectual outputs of the host institution to the global audience. At present, it archives conference papers, journal articles, preprints and theses authored by NITR researchers and faculty members. Registered users of the portal can get email alerts on regular intervals to notify them of newly added relevant contents. This repository is compliant to OAI-PMH (Protocol for Metadata Harvesting) and indexed in the CASSIR (Cross Archive Search Service for Indian Repositories), OAIster and OpenDOAR (Directory of Open Access Repositories).

Electronic Theses and Dissertations of Indian Institute of Science (ETD@IISc)

etd AT Indian Institute of Science >

Welcome to etd@IISc!

This is the digital repository of Theses and Dissertations of [Indian Institute of Science](#), Bangalore, India. You can search, browse and access theses and dissertations from this collection. This repository has been developed to capture, disseminate and preserve research theses of Indian Institute of Science. It complements [ePrints@IISc](#), the research publications repository of IISc.

Number of theses in etd@IISc: 272

Brief Description:

The ETD@IISc is an institutionally acclaimed open access theses and dissertations repository of the Indian Institute of Science - a joint service of the National Centre for Science Information (NCSI) and the IISc Library. This repository disseminates and preserves high quality research theses of the Indian Institute of Science. This service is a complement to ePrints@IISc, the research publications repository of IISc. Apart from electronic copies of recently submitted theses, this repository also includes digitized theses, where digitization of old documents is an on-going project at IISc. The Indian Institute of Science established an 'IISc INDEST User Group' that has subgroups on 'Thesis Format Guidelines', 'Copyright Issues' and 'Technology Issues for Archival and Online Hosting'. ETD@IISc hosts some operational guidelines and agreement forms, derived from the recommendations of the User Group, for the perusal of IISc researchers and members of the INDEST Consortium. Over the time this ETD initiative has become a role model amongst the members of INDEST Consortium. The INEDEST Consortium has a strong advocacy role in the formulation of policy for establishment of open access ETD repositories and/or open access institutional repositories in its respective member institutions.

The record display page of individual thesis provides links to full-text objects, along with descriptive metadata such as title, author, subject, keywords, date of submission, publisher, abstract, URI, and the name of collection. Figure 22 shows the distribution of electronic theses in the repository by subject, that depicts Division of Mechanical Sciences has maximum contribution to this open access archive.

This repository is compliant to OAI-PMH (Protocol for Metadata Harvesting) and indexed in the CASSIR (Cross Archive Search Service for Indian Repositories), OAIster and OpenDOAR (Directory of Open Access Repositories).

Brief Description:

The Indian Institute of Science (IISc), located at Bangalore, is India's most renowned research institution having a world class reputation in the research areas of applied sciences and technologies. The Open Access Repository of IISc Research Publications (ePrints@IISc) is one of oldest open access channels in India, having about 8700 full-text research literature largest amongst Indian institutional repositories. This institutional repository collects, preserves and disseminates intellectual outputs of IISc research community, available in digital format. The research community can self-deposit their scholarly publications using a web interface, and organize these publications for easy retrieval. While ePrints@IISc can be accessed by anybody across the world, submission of documents to this repository is limited to the IISc research community. This repository is compliant to OAI-PMH (Protocol for Metadata Harvesting) and indexed in the CASSIR (Cross Archive Search Service for Indian Repositories), OAISter, Google Scholar and OpenDOAR (Directory of Open Access Repositories). While search engines accelerate access to full-text contents in this repository, the international visibility of research publications archived in this repository increases manifold.

IDRC Digital Library

Type of Initiative: Institutional Repository

Principal Implementing Agency: International Development Research Centre, Ottawa, Canada

Participating Institution (Sub-Regional): International Development Research Centre, South Asian Regional Office, New Delhi

Supporting Agencies (Overseas): International Development Research Centre, Ottawa, Canada

Software Used: DSpace

Web Address 1: <http://idl-bnc.idrc.ca/>

Web Address 2: <https://idl-bnc.idrc.ca/dspace/>

Brief Description:

The International Development Research Centre (IDRC) is a Canadian government corporation that helps the people of developing countries design and conduct research to solve their own

development problems. IDRC emphasizes building the capacity of its partners to be able to creatively respond to the challenges they face, wherever they are. The Regional Office for South Asia and China of IDRC is located in New Delhi and is mainly responsible for delivering IDRC's programme of research support to development activities in Afghanistan, Bangladesh, Bhutan, China, India, Maldives, Nepal, Pakistan and Sri Lanka. The IDRC Digital Library provides access to a current and comprehensive collection of research results and documents generated by IDRC-funded projects, IDRC-supported researchers and IDRC staff about a wide range of subjects related to international development on four broad themes - environment and natural resource management, information and communication technologies for development, innovation policy and science, and social and economic policy. This digital archive has a collection called *Pan Asia* that provides access to documents depicting results of research conducted in Asian region. The IDRC Digital Library includes research publications in different formats, such as:

- Books
- Conference Papers
- Conference Proceedings
- Evaluation Reports
- Journal Articles
- Project Reports
- Technical Reports
- Theses and Dissertations
- Working Papers
- Workshop Reports

This repository is compliant to OAI-PMH (Protocol for Metadata Harvesting) and indexed in the OpenDOAR (Directory of Open Access Repositories), Google Scholar and OAIster.

Digital Repository of IIT Bombay

The screenshot shows the homepage of the Digital Repository of IIT Bombay. The header includes the IIT Bombay logo and the text 'Digital Space' and 'Central Library, Indian Institute of Technology Bombay'. The main content area is divided into several sections: a search bar, a welcome message, a search input field, and a list of publications. The sidebar on the right contains links for 'About IITB', 'Education', 'Evaluation Copyright', 'IIT Bombay', and 'Contact'. At the bottom, there is a Creative Commons license logo and text.

Type of Initiative: Institutional Repository

Principal Implementing Agency: Central Library, Indian Institute of Technology Bombay

Supporting Agency: Indian Institute of Technology Bombay (IITB), Ministry of Human Resource Development, Government of India

Software Used: DSpace

Web Address: <http://dspace.library.iitb.ac.in/dspace/>

Brief Description:

The Indian Institute of Technology Bombay is an internationally acclaimed technological institution in India. The Digital Repository of IIT Bombay is now a prototype system, providing access to faculty publications. This repository strives to become a reliable and open access scholarly communication channel for disseminating research publications produced by the research community in the institute. This repository covers in applied science, engineering and technology areas.

Type of Initiative: Institutional Repository

Principal Implementing Agency: National Centre for Radio Astrophysics (NCRA), Pune

Participating Institution: Giant Metrewave Radio Telescope (GMRT), Pune

Supporting Agency: Tata Institute of Fundamental Research (TIFR), Department of Atomic Research (DAE), Government of India

Software Used: DSpace

Web Address: <http://ncralib.ncra.tifr.res.in:8080/dspace/>

Brief Description:

The National Centre for Radio Astrophysics (NCRA) is a premier Indian research centre in the area of radio astrophysics and astronomy. NCRA provides a unique facility for radio astronomical

research at metre wavelengths, called Giant Metrewave Radio Telescope (GMRT). GMRT is a very versatile instrument for investigating a variety of radio astrophysical problems ranging from nearby Solar system to the edge of observable Universe. DSpace at NCRA provides access to research publications produced by researchers of this centre. Presently major collections consist of technical reports, theses and journal articles, where some research publications are based on data from the GMRT facility.

The main content area is titled "Digital Repository Service (DRS)" and contains a search bar, a list of publications, and a section for "About the Service". The footer includes the text "DRS is a service of the National Institute of Oceanography, Council of Scientific and Industrial Research (CSIR), Government of India" and a copyright notice for 2014.

Type of Initiative: Institutional Repository

Principal Implementing Agency: National Information Centre for Marine Sciences (NICMAS), National Institute of Oceanography, Goa

Supporting Agency: National Institute of Oceanography, Council of Scientific and Industrial Research (CSIR), Government of India

Software Used: DSpace

Web Address: <http://drs.nio.org/>

Related Project: CSIR Explorations <http://csirexplorations.com/>

Brief Description:

The National Institute of Oceanography (NIO), India is a premier research institution devoted to interdisciplinary research in oceanography, marine sciences and Antarctic sciences. The NIO Digital Repository Service (DRS) is an institutional repository disseminating full-text institutional publications, such as journal articles, conference papers, conference proceedings, technical reports, theses, and dissertations. The publications are self-archived by its researchers and scientists. This repository covers interdisciplinary subject areas related to oceanography and

marine sciences. The collections of this repository are arranged by basic subjects, such as:

- Biological Sciences
- Chemical Sciences
- Engineering and Instrumentation
- Geology and Geophysical Sciences
- Interdisciplinary Oceanography
- Marine Archaeology
- Materials Sciences
- Miscellaneous
- Physical Sciences

This repository is compliant to OAI-PMH (Protocol for Metadata Harvesting) and indexed in the CASSIR (Cross Archive Search Service for Indian Repositories), and OpenDOAR (Directory of Open Access Repositories).

Principal Implementing Agency: ICAFI Business School, Ahmedabad, India

Supporting Agency: Institute of Chartered Financial Analysts of India (ICFAI)

Software Used: DSpace

Web Address: <http://202.131.96.59:8080/dspace>

Brief Description:

The ICAFI Business School is a private sector management institute having branches all over the country. ICAFI Business School, Ahmedabad has established an institutional repository harbouring publications produced by the Institute's students and faculty members in the areas of management sciences, economics, planning, mathematics, statistics, and information science. This repository stores publications such as journal articles, case studies, conference papers, conference proceedings, unpublished documents, research reports, books and learning materials. It is compliant to OAI-PMH (Protocol for Metadata Harvesting) and indexed in the CASSIR (Cross Archive Search Service for Indian Repositories), and OpenDOAR (Directory of Open Access Repositories).

DSpace@IIMK

Type of Initiative: Institutional Repository

Principal Implementing Agency: Indian Institute of Management Kozhikode, India

Supporting Agency: Indian Institute of Management Kozhikode, Ministry of Human Resource Development, Government of India

Software Used: DSpace

Web Address: <http://dspace.iimk.ac.in/>

Allied Projects: Greenstone Support for South Asia <http://greenstonesupport.iimk.ac.in/>;

IIMK Digital Library <http://www.iimk.ac.in/gsdll/cgi-bin/library>

Brief Description:

The Indian Institute of Management Kozhikode (IIM Kozhikode) is one of the top business schools in the country, involved in academic and sponsored research in the interdisciplinary areas of economics, management, trade, commerce, industries and related areas. The DSpace@IIMK is an institutional repository of the IIM Kozhikode. This repository provides open access archiving facilities to the IIMK communities such as faculty members, students and researchers, to reach worldwide audiences and to improve impact of their research. It covers book reviews, case studies, journal articles, conference papers, working papers and conference proceedings in the areas of management, business, economics, communication, and social sciences. It facilitates self-archiving and long-term preservation of scholarly publications. It is compliant to OAI-PMH (Protocol for Metadata Harvesting) and indexed in the CASSIR (Cross Archive Search Service for Indian Repositories), and OpenDOAR (Directory of Open Access Repositories).

Indian Institute of Astrophysics Repository

The screenshot shows the homepage of the Indian Institute of Astrophysics Repository. The page is titled "Indian Institute of Astrophysics Repository" and features a navigation menu on the left. The main content area includes a welcome message, a search bar, and a list of communities in DSpace. The footer contains the website address: <http://prints.iiap.res.in/>.

Type of Initiative: Institutional Repository

Principal Implementing Agency: Indian Institute of Astrophysics, Bangalore

Participating Institutions: Astronomical Society of India; Vainu Bappu Observatory, Kavalur; Madras Observatory, Chennai; Kodaikanal Solar Observatory, Kodaikanal

Supporting Agency: Indian Institute of Astrophysics, Ministry of Science and Technology, Government of India

Software Used: DSpace

Web Address: <http://prints.iiap.res.in/>

Brief Description:

The Indian Institute of Astrophysics (IIAP) is a premier research institution devoted to research in astronomy, astrophysics and related physics. IIAP hosts Asia's finest astronomical observing facilities, located at Gauribidanur, Hanle, Kavalur and Kodaikanal. The IIAP Repository is the open access institutional repository, developed to capture, disseminate and preserve research

publications of the IIAP. The repository also gives access to full-text contents of current and back volumes of *Bulletin of the Astronomical Society of India* from volume one in 1973. This repository hosts the following collections:

- Archival Collections
- IIAP PhD Theses
- IIAP Publications such as journal articles, conference papers and preprints of IIAP scientists and researchers
- Research publications based on data from Indian Astronomical Observatory
- Newspaper Clippings and Magazine Articles on IIAP
- IIAP Profiles and Photographs
- Papers published in *Bulletin of the Astronomical Society of India*

The content in Archival Collections include old records, manuscripts, publications and photographs of people and instruments belonging to the Madras and Kodaikanal Observatories and IIAP branch offices in Bangalore, Kavalur and Leh during 18th, 19th and early 20th Century. This repository is compliant to OAI-PMH (Protocol for Metadata Harvesting) and indexed in the CASSIR (Cross Archive Search Service for Indian Repositories), OAIster and OpenDOAR (Directory of Open Access Repositories).

DSpace at National Chemical Laboratory

Type of Initiative: Institutional Repository

Principal Implementing Agency: National Chemical Laboratory, Pune

Supporting Agency: National Chemical Laboratory, Council of Scientific and Industrial Research (CSIR), Ministry of Science and Technology, Government of India

Software Used: DSpace

Web Address: <http://dspace.ncl.res.in/dspace/>

Allied Projects: Moltable (Chemoinformatics Portal) <http://moltable.ncl.res.in/> ;

CSIR Explorations <http://csirexplorations.com/>

Brief Description:

The DSpace@NCL is an institutional repository of the National Chemical Laboratory, a premier public R&D institution of Council of Scientific and Industrial Research (CSIR). This repository provides open access archiving facilities to the NCL communities such as scientists and researchers, to reach worldwide and to improve impact of their scholarly publications. The majority of material currently consists of PhD theses and patents. It also covers research papers of NCL scientists, technical reports, project reports, research reports, journal articles and conference papers in different areas of chemical sciences and chemical technologies. It facilitates self-archiving and long-term preservation of scholarly publications. Using this facility, registered users can set up email alerts to notify them of newly added relevant content. This repository is compliant to OAI-PMH (Protocol for Metadata Harvesting) and indexed in the CASSIR (Cross Archive Search Service for Indian Repositories), OAster and OpenDOAR (Directory of Open Access Repositories).

DSpace@INFLIBNET

The screenshot displays the DSpace@INFLIBNET website. At the top, there is a header with the INFLIBNET logo and the text "A network of Indian Libraries & Documental Centres". Below the header, the main content area is divided into several sections. On the left, there is a navigation menu with links for "Home", "About", "Browse", "Sign on bar", and "Admin Page". The central part of the page features a search bar and several informational boxes. The top box is titled "DSpace@INFLIBNET is a free" and contains text about the repository's mission. Below it is a "Research" section with a search input field and a "GO" button. The bottom box is titled "DSpace@INFLIBNET is a free" and contains text about the repository's mission. On the right side, there is a sidebar with the text "DSpace@INFLIBNET" and "Network of Indian Libraries & Documental Centres".

Type of Initiative: Institutional Repository

Principal Implementing Agency: Information and Library Network (INFLIBNET) Centre, Ahmedabad

Participating Institutions: UGC-recognized Universities in India

Supporting Agency (Indian): University Grants Commission (UGC), Ministry of Human Resource Development, Government of India

Software Used: DSpace

Web Address: <http://dspace.inflibnet.ac.in/>

Allied Projects:

- UGC Infonet <http://web.inflibnet.ac.in/UGC-InfoNet/>,
<http://unicat.inflibnet.ac.in/econ/mindex.htm>
- National Online Union Catalogue <http://202.141.12.214:8080/unicat/>

Brief Description:

The Information and Library Network (INFLIBNET) Centre, India is an autonomous Inter-University Centre (IUC) of University Grants Commission (UGC), involved in creating information infrastructure for academic and research institutions, particularly for universities and colleges in India. The INFLIBNET Centre organizes two annual conventions, namely, CALIBER and 'Promotion of Library Automation and Networking in North Eastern Region' (PLANNER). This institutional repository contains proceedings of CALIBER and PLANNER. It also provides full-text access to collections such as, dArchive India (Digital Academic and Research Content for Value Education), news clippings about INFLIBNET, INFLIBNET publications including newsletters and Regional Training Programme in Library Automation (RTPLA) course materials. It is compliant to OAI-PMH (Protocol for Metadata Harvesting) and indexed in the CASSIR (Cross Archive Search Service for Indian Repositories), OAIster and OpenDOAR (Directory of Open Access Repositories).

Web Address: <http://dspace.tiet.ac.in:8080/dspace/>

Brief Description:

Thapar University, India is a privately managed grant-in-aid technical university, located in the Punjab. DSpace at Thapar University is an institutional repository that collects, preserves and disseminates the intellectual outputs of the host institution to the global audience. At present, it

provides access to full-text contents of electronic theses and dissertations (ETD), workshop proceedings, journal articles, and conference papers authored by its researchers and faculty members. The scholarly literature is arranged in this repository in following collections: Academics@TU, Administration@TU, Public Documents and Research@TU. Registered users of the portal can get email alerts on regular intervals to notify them of newly added relevant contents. In association with UNESCO, Thapar University conducted an Advanced Workshop on ISIS for Windows in year 2007. The training modules are now available in this repository.

The screenshot shows the DSpace Institutional Repository interface. At the top, there is a search bar and navigation links. The main content area is titled "Browse by Title" and displays a list of 15 items. The items are organized into a table with columns for Date of Issue, Title, and Authors.

Maintained by RRI Library Powered by DSpace

Type of Initiative: Institutional Repository

Principal Implementing Agency: Raman Research Institute Library, Bangalore

Supporting Agency: Raman Research Institute, Department of Science & Technology, Government of India

Software Used: DSpace

Web Address: <http://dspace.rrri.res.in:8080/dspace/>

Brief Description:

The Raman Research Institute (RRI), India founded by Nobel laureate Sir C.V.Raman in 1948, is a premier research centre in the area of physical science. The RRI Digital Repository is an institutional repository providing worldwide access to the research publications, contributed by the

faculty members and scholars of the institute. This repository has already archived approximately 500 collected papers of C.V. Raman and other historical records of the Institute. It consists of the following collections: Archives (annual reports, Gandhi Memorial lectures and newspaper clippings), Astronomy and Astrophysics, C.V. Raman and his work, Light and Matter Physics, Soft Condensed Matter, Theoretical Physics, and Miscellaneous Publications. This repository is compliant to OAI-PMH (Protocol for Metadata Harvesting) and indexed in the CASSIR (Cross Archive Search Service for Indian Repositories), OAIster and OpenDOAR (Directory of Open Access Repositories).

EPrints and ETD at Indian Institute of Technology Delhi

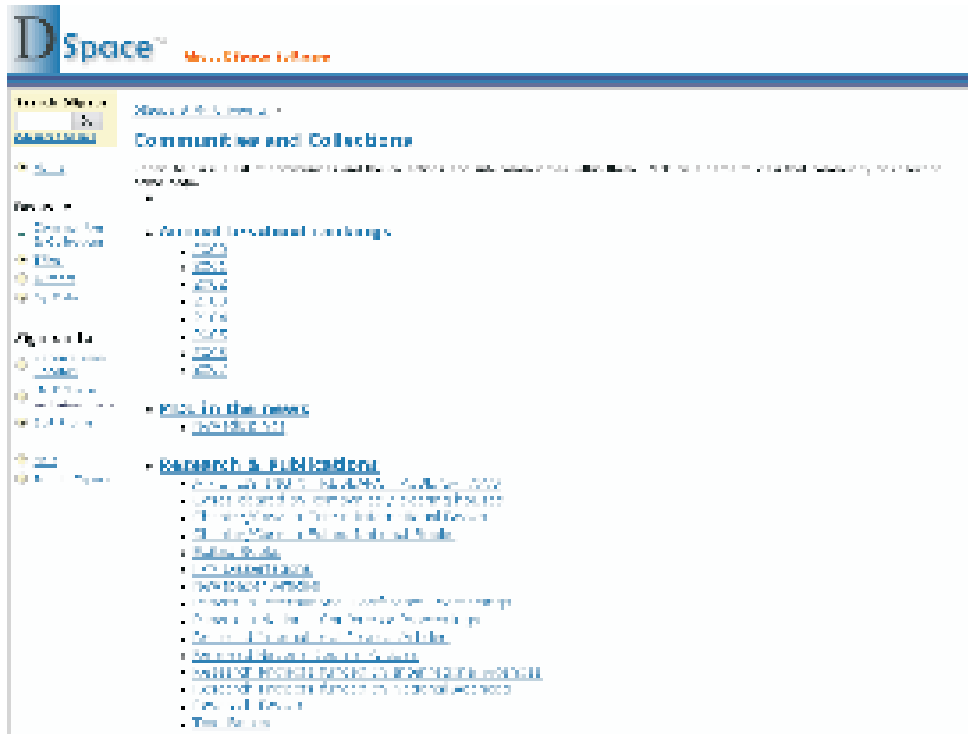

The screenshot shows the website interface for Eprints & ETD@IIT Delhi. The main content area includes a header with the repository name, a search box, and a section titled 'Communities in DSpace' which lists several collections such as 'Theses and Dissertations', 'Faculty Research Publications', and 'Central Publications@IIT Delhi'. The right sidebar features 'ETD @Central Library, IIT Delhi' and 'Mediated Deposit' information. The footer contains copyright information and a 'Powered By' link.

Type of Initiative: Institutional Repository

Principal Implementing Agency: Central Library, Indian Institute of Technology Delhi

Digital Repository at Management Development Institute

Type of Initiative: Institutional Repository

Principal Implementing Agency: Management Development Institute Library, Gurgaon

Supporting Agency: Management Development Institute (MDI), India

Software Used: DSpace

Web Address: <http://dspace.mdi.ac.in/dspace/>

Brief Description:

The Management Development Institute (MDI), Gurgaon is a leading business school in India. The MDI Digital Repository is an institutional repository providing worldwide access to the research publications, contributed by the faculty members and scholars of the institute. It also provides access to annual B-School rankings (published in news magazines) and MDI in the news (news clippings), in addition to multidisciplinary /interdisciplinary research publications of researchers and faculty members (such as journal articles, conference papers and business case studies). This repository is compliant to OAI-PMH (Protocol for Metadata Harvesting) and indexed in the CASSIR (Cross Archive Search Service for Indian Repositories), OAIster and OpenDOAR (Directory of Open Access Repositories).

National Aerospace Laboratories Institutional Repository (NAL Repository)

National Aerospace Laboratories Institutional Repository

Home About Browse Search Register User Area Help

Welcome to NAL Institutional Repository

NAL Institutional Repository is the digital archive of the research outputs of our scientists. This knowledge base covers project documents, conference papers, technical reports, presentations and presentations. These include all. One can browse the documents by author, title or subject, date and document type. Both simple and advanced search facilities are provided. ICAST helps to make this a digital archive of our research outputs. All documents are available in digital format and are available for viewing.

Allied Projects:

- AeroInfo: Aerospace Virtual Library <http://www.aeroinfo.org.in>
- Aerospace News Clippings <http://www.icast.org.in/news/newsclips.php>

Brief Description:

The National Aerospace Laboratories (NAL), established in 1959, is India's greatest R&D establishment in aeronautics and allied disciplines. NAL's Institutional Repository is the open access digital archive for the research outputs of NAL scientists. This knowledge-base comprises project documents, technical reports, journal articles, conference papers and workshop papers. The

documents in this repository can be browsed by year, subject, department, author and type of publications. Both simple and advanced search facilities have been provided. NAL scientists can submit their publications on their own, after a one-time user registration process. The NASA Aerospace Subject Heading is assigned in each record of this database, where main subject categories under this subject heading scheme are as follows:

- Aeronautics
- Astronautics
- Chemistry and Materials
- Engineering
- General
- Geosciences
- Life Sciences
- Mathematical and Computer Sciences
- Physics
- Social and Information Sciences
- Space Sciences

This repository is compliant to OAI-PMH (Protocol for Metadata Harvesting) and indexed in the CASSIR (Cross Archive Search Service for Indian Repositories), Google Scholar, OAIster and OpenDOAR (Directory of Open Access Repositories).

Type of Initiative: Institutional Repository

Principal Implementing Agency: OneWorld South Asia, New Delhi

Supporting Agency: OneWorld International Foundation, UK

Software Used: EPrints

Web Address: <http://open.ekduniya.net/>

Allied Projects:

- Digital Opportunity Channel www.digitalopportunity.org
- Initiative on Social Justice <http://socialjustice.ekduniya.net>

Brief Description:

OneWorld South Asia (OWSA) is an international civil society organization located at New Delhi, having a network of 500 grassroots organisations dedicated to voicing the voiceless and exploring the role of ICTs in achieving the Millennium Development Goals (MDGs). OWSA undertakes several initiatives to build and strengthen Communities of Practice (CoPs) around the MDGs to facilitate knowledge and information sharing in the region. OWSA is also involved in programmes related to grassroots communication, knowledge for development, capacity building, networking, advocacy and awareness raising. The OWSA Open Archive Initiative is a knowledge and information sharing initiative, launched to disseminate development literature generated by OWSA partner organizations and other development practitioners working in this sub-region. This open access repository provides access to books, monographs, book chapters, workshop materials, training modules, media articles, conference papers, presentations and journal articles. The documentary resources available here are mostly related to aspects of ICT-enabled development in global and local context. The documents available in this archive cover following sub-categories:

- Access to Information
- Building Confidence, Trust and Security
- Capacity Building
- Cultural and Linguistic Diversity, Local Content
- Enabling Environment (Policy, Legal and Regulatory Framework)
- Ethical Dimensions of the Information Society
- ICT Applications for Development
- Inclusive Information Society
- Information and Communication Infrastructure
- Media

This repository is compliant to OAI-PMH (Protocol for Metadata Harvesting) and indexed in the CASSIR (Cross Archive Search Service for Indian Repositories), Google Scholar, OAIster and OpenDOAR (Directory of Open Access Repositories).

CONCLUSION

Open access to knowledge and information as we may see from this listing has far to go in South Asia. It is largely achievable in a country where policy frameworks, institutional frameworks, information infrastructure, trained manpower, and financial resources are adequately available. The effect of focused capacity building programmes in the areas of digital preservation, digital libraries and open access to literature is encouraging in a country like India, where significant proliferation of open access and digital library initiatives have been achieved in the last decade. A number of workshops and training events were organized in India during this period, where a few thousand library and computer professionals received training in open source software for building open access repositories. Library schools in India have since included open source digital archiving software in their curricula. Several national and international conferences, seminars, and symposia were also organized in India, where library professionals discussed methods and techniques of digitization, digital library development, institutional repository development and digital preservation. India has now become the leader in digital library and open access initiatives in South Asia and across Asia, due to stakeholders' active participation in capacity building processes as well as the availability of financial resources. The key to commitment and development in this field lies in the sensitization of stakeholders as which has been done in India. In Pakistan, policy and institutional frameworks are being reinforced to embrace open access initiatives. In other South Asian countries such as Afghanistan, Bangladesh, Bhutan, Nepal, Maldives and Sri Lanka, however, there remains significant room for more awareness raising, capacity building, and sensitization programmes involving stakeholders in order to achieve that paradigm shift in universal access to information, knowledge and heritage.

The sustainability of open access portals is another issue that requires proper attention. Too often, the open access portal in an institution may remain non-functional due to some internal dynamics, pointing to the need for introduction and maintenance of proper institutional frameworks and manpower development in this field. Coordinators of self-archived institutional repositories may also sensitize community members on the importance of open access to knowledge and provide training in self-archiving methods on a regular basis.

Open access to South Asian literature both scholarly communications and development-related literature ensures global visibility and accessibility, resulting in increased global recognition. Open access to information and knowledge not only enables digital inclusion of common citizens, particularly under-privileged communities, but also bridges social divides.

WSIS Declaration of Principles

Building the Information Society: A Global Challenge in the New Millennium

Access to Information and Knowledge

The ability for all to access and contribute information, ideas and knowledge is essential in an inclusive Information Society.

The sharing and strengthening of global knowledge for development can be enhanced by removing barriers to equitable access to information for economic, social, political, health, cultural, educational, and scientific activities and by facilitating access to public domain information, including by universal design and the use of assistive technologies.

A rich public domain is an essential element for the growth of the Information Society, creating multiple benefits such as an educated public, new jobs, innovation, business opportunities, and the advancement of sciences. Information in the public domain should be easily accessible to support the Information Society, and protected from misappropriation. Public institutions such as libraries and archives, museums, cultural collections and other community-based access points should be strengthened so as to promote the preservation of documentary records and free and equitable access to information.

Access to information and knowledge can be promoted by increasing awareness among all stakeholders of the possibilities offered by different software models, including proprietary, open-source and free software, in order to increase competition, access by users, diversity of choice, and to enable all users to develop solutions which best meet their requirements. Affordable access to software should be considered as an important component of a truly inclusive Information Society.

We strive to promote universal access with equal opportunities for all to scientific knowledge and the creation and dissemination of scientific and technical information, including open access initiatives for scientific publishing.

WSIS Plan of Action

C3. Access to Information and Knowledge

ICTs allow people, anywhere in the world, to access information and knowledge almost instantaneously. Individuals, organizations and communities should benefit from access to knowledge and information.

Develop policy guidelines for the development and promotion of public domain information as an important international instrument promoting public access to information.

Governments are encouraged to provide adequate access through various communication resources, notably the Internet, to public official information. Establishing legislation on access to information and the preservation of public data, notably in the area of the new technologies, is encouraged.

Promote research and development to facilitate accessibility of ICTs for all, including disadvantaged, marginalized and vulnerable groups.

Governments, and other stakeholders, should establish sustainable multi-purpose community public access points, providing affordable or free-of-charge access for their citizens to the various communication resources, notably the Internet. These access points should, to the extent possible, have sufficient capacity to provide assistance to users, in libraries, educational institutions, public administrations, post offices or other public places, with special emphasis on rural and underserved areas, while respecting intellectual property rights (IPRs) and encouraging the use of information and sharing of knowledge.

Encourage research and promote awareness among all stakeholders of the possibilities offered by different software models, and the means of their creation, including proprietary, open-source and free software, in order to increase competition, freedom of choice and affordability, and to enable all stakeholders to evaluate which solution best meets their requirements.

Governments should actively promote the use of ICTs as a fundamental working tool by their citizens and local authorities. In this respect, the international community and other stakeholders should support capacity building for local authorities in the widespread use of ICTs as a means of improving local governance.

Encourage research on the Information Society, including on innovative forms of networking, adaptation of ICT infrastructure, tools and applications that facilitate accessibility of ICTs for all, and disadvantaged groups in particular.

Support the creation and development of a digital public library and archive services, adapted to the Information Society, including reviewing national library strategies and legislation, developing a global understanding of the need for "hybrid libraries", and fostering worldwide cooperation between libraries.

Encourage initiatives to facilitate access, including free and affordable access to open access journals and books, and open archives for scientific information.

Support research and development of the design of useful instruments for all stakeholders to foster increased awareness, assessment, and evaluation of different software models and licences, so as to ensure an optimal choice of appropriate software that will best contribute to achieving development goals within local conditions.

C7. ICT applications: Benefits in All Aspects of

E-science Life

- Promote electronic publishing, differential pricing and open access initiatives to make scientific information affordable and accessible in all countries on an equitable basis.

C8. Cultural Diversity and Identity, Linguistic Diversity and Local Content

- Develop national policies and laws to ensure that libraries, archives, museums and other cultural institutions can play their full role of content - including traditional knowledge - providers in the Information Society, more particularly by providing continued access to recorded information.
- Support efforts to develop and use ICTs for the preservation of natural and, cultural heritage, keeping it accessible as a living part of today's culture. This includes developing systems for ensuring continued access to archived digital information and multimedia content in digital repositories, and support archives, cultural collections and libraries as the memory of humankind.
- Support local content development, translation and adaptation, digital archives, and diverse forms of digital and traditional media by local authorities. These activities can also strengthen local and indigenous communities.
- Provide content that is relevant to the cultures and languages of individuals in the Information Society, through access to traditional and digital media services.
